Canon Hicks Preached Here Last Sunday

DELIVERED PLAIN AND IMPRESSIVE ADDRESS TO LARGE CONGREGATION — PLEADS FOR REGULARITY OF ATTENDANCE AT COMMUNION

St. Ambrose church was taxed to its capacity to accommodate the large congregation assembled to hear Canon Hicks, who conducted the service on that occasion.

In opening his remarks Canon Hicks referred to the appearance of Satan in the Garden of Eden and of how he secured the fall of Adam and Eve by ridiculing and condemning the plans and pronouncements of God. The same Satan is at work in the same way today. Because of this many are being led away from the sacred duties and responsibilities. The speaker's chief idea was to impress upon his hearers the importance of first identifying themselves with the church, and then regular attendance at communion and other church services. There were many excuses given for not doing so, and this was where Satan was getting in his work today. Among the excuses heard are "My next door neighbor does these things and is no better for it"; "I'm not good enough to go," and "I don't understand it." These excuses were all swept aside by the speaker when he said that when we appeared before the Great White Throne, there to be judged for the deds done in the body, we were not questioned about our next door neighbor's actions. Those who say they are not good enough are telling the truth, as no one is good enough, but a faithful and regular attendance at communion would give the needed strength and hope to overcome temptation, would make them better and would open up their understanding.

If there were those who did not want to be good themselves and did not want to try to be better, he pleaded with them not to make fun of others who were trying to live better lives. He would rather die dead himself than place a stumbling block in the way of anyone who was trying to do their whole duty, no matter what his creed or religion.

His address throughout was a strong plea for regularity at communion, and there is no doubt it felt a lasting impression upon his hearers.

Local I.O.O.F. Officers Installed Last Week

The newly elected officers of the local Oddfellows' Lodge went to Medicine Hat last week, where a joint installation ceremony was conducted by Bro. S. Schroder, D.D.G.M., assisted by Bro. E. L. Cope, as marshal. The following were the Redcliff officers installed:

N.G.—Rev. Bro. C. F. Orman.
V.G.—Bro. R. Black.
Rec. Sec.—Bro. R. A. Towell.
Fin. Sec.—Bro. C. C. Buckholz.
Treas.—Bro. W. Keatz.

The Recent Rains Improve Conditions

Resulting from the copious rains which have been received in the majority of the farming centres of this province during the past few days, reports of crop conditions throughout the province received at the local office of the C.P.R. are of a more optimistic trend than previously, and in many cases, especially in the southern parts of the province, forecast good crops this year. In the north the situation has been considerably relieved, although rain is still needed in most of the centers to insure the harvesting of fair crops. Farmers are less pessimistic than they were a few weeks ago, and most of them think that although real good crops in most of the districts are not assured, fair crops will be general this year with a fair amount of moisture.

In the immediate vicinity around Redcliff there is no hope of any bumper crop, although the recent rains have made a vast improvement, and prospects are now good for a fair crop in many districts. Backward grain is also coming ahead lately and will at least now make good feed. Pastures are in excellent condition and stock never looked better.

ONTARIO FARMERS NOW CUTTING FALL WHEAT

Much of Ontario's first crop of sweet clover has been harvested, and the hay crop has also been gathered in, in some of the more advanced districts of the province. Cutting of fall wheat is well under way in many counties, according to the weekly report of the Ontario department of agriculture. Some points complain of rust, owing to much wet weather, and the Hessian fly has been giving trouble.

Corn fields are reported somewhat disappointing, but the root crops are showing up well.

Among the fruits, cherries, gooseberries and currants are giving a generous yield.

"There has been generally complaint of the scarcity of help," the report concludes, "although farmers are willing to pay good wages to fair workers."

Great Interest Taken In Local Rifle Range

The local rifle range has been fairly well patronized since the opening shoot and keen interest is being taken in it by the members.

Now that the Wednesday half holiday has been decided upon by the merchants, there will be regular shooting at the range every Wednesday afternoon, commencing at two o'clock.

All those who are desirous of joining and have not been able to do so as yet are asked to do so as soon as possible in order to get into the competitions which will soon be arranged.

Although a number of the members are new at the game good scores have already been made. Out of a possible 35 points at 200 yards the following are the best scores made so far:

C. D. Scott	31
J. Komick	26
G. N. Pearson	24
E. J. Osgood	24
T. Hall	23
C. G. M. McBey	23
F. Baird	22
R. Beames	22
B. Hurlbebrt	22
J. Waters	21
J. Jardine	21

Does Not Think Can Have Wheat Board This Year

THIS IS OPINION OF H. W. WOOD, PRESIDENT U.F.A.—DOMINION ACT NOT PRACTICABLE—BETTER TO WAIT AND ASSURE SUCCESS

"I am very much of the opinion that the wheat board organized under the act just passed by the Dominion government will not be workable in giving practical and satisfactory results," remarked H. W. Wood, president of the U.F.A., when he was asked for his views regarding the proposed new legislation.

"While I am not prepared at the present moment to discuss the bill in all its details, he said, "broadly speaking it vests all the power of control in the hands of the Dominion government, and at the same time it places all the responsibility on the provincial governments.

"This to my mind," he said, "is sufficient in itself to make the practical workability of the board a very doubtful proposition. It is true that with full and sympathetic co-operation all round, success might be achieved, but I do not think that the government has shown sufficient sympathy and enthusiasm towards the aims and objects to be accomplished by the wheat board to warrant a complete and sympathetic co-operation.

"If the act passed by the Dominion government is not workable," he continued, "and in my opinion it is not, we had better wait another year and start a wheat board on a practical basis than to do so now on an impracticable basis and make a failure when.

Mr. Wood said that speaking for himself only he believed it was a problem that the three prairie provinces were going to work out for themselves. "I do not believe they can work it out in time for the handling of the 1922 crop," he said very decidedly, "but I do believe they will work it out just as soon as they possibly can."

Voluntary Wheat Pool a Success In Sister Colony

A. K. Trethowan, of Sydney, Australia, chairman of the Australian wheat board, is in Canada for the present time, meeting representatives of the grain interests, farmers and business men on the subject of forming a world-wide wheat pool, organized similarly to the recent Canadian wheat board, but having as its scope the entire world.

According to statements made by Mr. Trethowan in Regina the object of the proposed international wheat selling board or committee is to provide for an exchange of information between Canada, the United States and Australia with respect to wheat marketing conditions, the object being to arrange if possible so that the market at Liverpool might not become glutted at any time as a result of heavy shipments arriving there from these countries at the same time, thus forcing the price of grain down.

He said that interference with Canadian wheat marketing operations was not being sought for, but that he was merely trying to make arrangements so that they would be of mutual advantage to the countries involved.

Outlining what marketing conditions in his own country, Mr. Trethowan said that the voluntary wheat pools operated in the different states of the commonwealth during the past year have been very successful. It was said that despite the fact that the pool in his own state was organized and put into operation in the short space of six days and at a time when the crop was all ready to market, more than 70 percent of the farmers had shipped through the pool and he anticipated that 90 percent of the farmers will adopt this method of selling their wheat when the next crop is marketed.

Regina Report Says That Wheat Pool Is Now Up to Alberta

Saskatchewan Premier Will Call Special Session of His Legislature if Alberta Does Likewise---Greenfield to Consult Cabinet

Concerning the meeting held in Regina between the premiers of the two provinces to discuss the wheat board question, the following report is sent out from Regina:

Whether a wheat marketing pool under concurrent federal and provincial legislation is in operation to handle this year's grain in the farmers' elevators of Saskatchewan and Alberta, depends on the attitude of the Alberta government. This was made clear at an all day conference in Regina, in which the premiers and attorney-generals of the two provinces participated.

It was announced by Premier Dunning at the close of the conference that the Saskatchewan government stood ready to call a special session of the legislature to pass the necessary concurrent legislation. Beyond stating that he was returning to Edmonton to discuss with other members of the government the advisability of calling a special session of the Alberta legislature for a similar purpose, Premier Greenfield declined to further discuss his attitude or the prospective attitude of the Alberta government and legislature toward the proposed marketing scheme.

The conference lasted all day, sessions being held morning, afternoon and evening. Col. J. A. Cross, of Regina, attorney-general for Saskatchewan, and Hon. J. E. Brownlee, of Edmonton, attorney-general of Alberta, took part in the deliberations. During the afternoon James Stewart, of Winnipeg, chairman of the 1919 wheat board, and F. W. Riddell, of this city, vice-chairman of the board, were called into consultation and assisted the members of the two governments with their advice and experience.

At the close of the conference Premier Dunning said:

"The premier of Alberta will consult his colleagues as soon as possible after his arrival home and the Alberta government will then decide whether or not they will call a special session of their legislature.

"So far as the Saskatchewan government is concerned," continued Mr. Dunning, "we are prepared to call a special session of this legislature, but in view of the fact that action by two provinces is necessary under the federal statute, we prefer to await the decision of the Alberta government before definitely deciding to do so.

Before returning home to Edmonton Premier Greenfield expressed himself quite satisfied with the conference.

Inquiry Into Gas Question Referred To A. A. Carpenter

Whole Question of Gas Supply And Possibilities to Come in Scope of Inquiry—Work to Commence Soon as ossible.

It was announced at Edmonton last Monday afternoon that A. A. Carpenter, chairman of the utilities commission, has been appointed by the government to investigate the field of distribution and supply of natural gas in Alberta.

Primarily his investigation will be for the purpose of accurately obtaining for the government all the facts involved in the application of the Canadian Western Natural Gas, light, Heat and Power company, as a basis for the reference to the court of appeal should the government decide it is necessary to make reference after considering the facts. Mr. arpenter will be asked to submit his findings on these points as soon as possible in order that the opinion of the court of appeal may be obtained without delay.

Inasmuch as the distribution of gas will probably become a live question in the province and will certainly be one of the principal questions before the next session of the legislature, the government has decided to obtain all information possible both for its own use in shaping any policies it may see fit to recommend to the legislature and for the benefit of the members during the session.

The commission to Mr. Carpenter gives him power of summonsing witnesses, requiring them to give evidence on oath and produce documents.

Mr. Carpenter will commence work at once and will hold his first session as soon as he can get out the necessary notices.

The scope of the investigation is outlined in the following paragraph:

"And whereas it is expedient and in the public intrest to cause inquiry to be made as to the natural gas which is now being obtained, or which may hereafter be obtained, in the province of Alberta, and the distribution thereof; and as to the manner and purposes for which such natural gas is being used, and as to the persons and corporations now owning gas wells and gas fields, and gas pipe lines; and as to the franchises which are now owned held, or enjoyed by any person or corporation in respect of the supply of natural gas to any city, town, village or municipality are dependent for their continued operation upon the supply of nature gas, and as to the highest price which such industries could be reasonably expected to pay for the supply of gas necessary for their successful operation; and particularly:

"As to the present production of natural gas within the province, the location of existing gas wells; their capacity and estimated lifetime; the parties owning or having any interest therein, and the precise nature of such interest or interests."

As Redcliff is vitally interested in this investigation the outcome will be anxiously looked for.

Champion Jack Dempsey and Harry Wills, through their managers, signed a contract to box for the world's heavyweight championship at a time and place to be named later.

Progressives Win In All Bye-Elections

United Farmer candidates have been elected with the by-elections which were held Monday, in Sedgewick, Ribstone and Whitford constituencies. In the Sedgewick riding, Albert C. Andrews was elected by acclamation; in Ribstone W. G. Farquharson is leading over John J. McKenna, Independent, by almost four to one, with half the polls still to hear from; and in Whitford, Mike Chorobiln has defeated A. S. Shandre, Liberal, by a majority of 1,253, with two polls not yet heard from.

As a result of these by-eections the standing in the house at present is as follows:

United Farmers	41
Liberals	4
Labor	1
Independent	2
Anti-Conservative	1

SIR GEORGE PROTHERO DEAD

Sir Geoley Prothero, editor of the Quarterly review and well known writer on historical subjects, died here today. He was born in 1848 and was knighted in 1920. He was president of the Historical society.

Ideal Weather Yesterday For Bowell Picnic

LARGE CROWD IN ATTENDANCE AND GOOD PROGRAMME OF SPORTS—MRS. McKINNEY GAVE ADDRESS AT CONCERT IN THE EVENING

Farmers of the Bowell district were favored with ideal weather for their picnic held yesterday afternoon. As a result there was a large crowd in attendance and a most interesting programme of sports was most successfully carried out. In the evening an entertainment was given in the school house by the boys of the Teen Age Class in connection with Gordon Memorial church here. For this the school was packed to the doors and many were unable to find even standing room. The entertainment was also pronounced a huge success. A plentiful supply sprung on the audience in the evening, when Mrs. S. Kinney, ex-M.L.A. for Claresholm, who is visiting Mrs. Haslam, was called upon to address the meeting. Mrs. McKinney gave a pleasing and encouraging address, in which she congratulated the farmers of the district for the energy, enthusiasm and courage with which they continued to carry on despite so many drawbacks and handicaps. The speaker also referred to the great success being made by the present administration at Edmonton in spite of the many predictions of ruin and disaster which would follow if the Progressive party got into power. She also urged the people of the district on the interest they were taking in the community life of the neighborhood, and strongly advised that this interest be carried to the larger field of provincial and dominion affairs. The entertainment consisted of the Progressive party both at Edmonton and Ottawa were making a good showing per cent of their success in the future depended on the support and encouragement they got from the rank and file.

The following is a list of the prize winners in the different athletic events during the afternoon:

Boys' race, 5 years—E. Johnson, T. Goddard, E. Day.
Boys race, 7 years—B. Brown, R Dubeau, J. Nowicki.
Girls' race, 7 years—M. Ryan, E Lapoint.
Boys' race, 9 years—A. Anderson Brown, M. McColman.
Girls' race, 9 years—M. Lightfoot, R. Fern.
Boys' race, 15 years—E. McLean, J. Quinn, N. Dixon.
Girls' race, 15 years—M. Dacre, E Sneath, L. Quinn.
Single men—G. Dixon, O. Olsen.
Single ladies—E. Sneath, E. Wallace.
Married men—M. ElEnridge, R. Brown.
Married women—Mrs. C. Goddard, Mrs. Geo. Dixon.
Men's 3-legged—C. Robertson and G. McNeely.
Boys' 3-legged—E. McLean and S. Cockrell.
Girls' 3-legged—D. Pancoast and C. Quinn.
Boys' horse race—D. Dixon, J. Dixon.
Ladies' horse race—L. Chapman, I Wilkinson.
Steer riding—W. Whitehead, A. Jackson.
Bucking mule—A. Jackson.

Premier King is in Washington discussing with President Harding the international agreement between United States and Canada, following out the policy of peace and neighborliness. In speaking of these happy relations, it would be timely if he had a good opportunity, refer to the folly of building high tariff walls between neighbors.

The coal strike situation in the United States, marked time on Tuesday, pending a decision of operators and miners in the anthracite and bituminous fields as to acceptance of President Harding's proposal for the rising of a new wage scale by arbitration and the immediate resumption of work.

BOY SCOUTS AFTER GRASSHOPPERS

A number of the older Boy Scouts leave this afternoon for Brecenlawn, where they will camp for a few days. While on the outing they will assist the farmers of the district distribute grasshopper poison in the mornings and evenings.

Will Probably Be Special Session Of Legislature

MAY BE CALLED EARLY IN AUGUST TO DISCUSS JOINING WITH SASKATCHEWAN IN FORMING WHEAT POOL—NO DECISION IS REACHED YET

According to reports from Edmonton it is very likely that a special session of the legislature will be called to meet early in August to discuss the matter of joining with Saskatchewan in the formation of a wheat pool.

Since returning to Edmonton Premier Greenfield held an all-day session with his cabinet, but no decision was reached. A meeting is again being held today, when it is expected a decision will be reached.

This morning's Albertan says in a news report from Edmonton:

A number of the members of the legislature who were at the exhibition Wednesday were of the opinion that the government would decide in favor of a special session of the Alberta house, in view of the strong pressure being brought to bear on the administration for the establishment of a wheat board and the attitude of the Saskatchewan government endorsing the proposal. It was thought that Premier Greenfield and the other members of the government would scarcely be able to withstand the demand for some form of government wheat marketing and in that event the house would probably be called together early in August.

GRAIN MARKETS

Following were the cash prices at Winnipeg yesterday: Wheat—No. 1 N. 1.23; No. 2, 1.20. Oats—No. 2 C.W., 38¾; No. 4 feed, 46¾. Rye—No. 2, 83¾.

With the exception of sections of central Saskatchewan east and west of Saskatoon, and in Alberta south and east of Drumheller for some distance, and north of Edmonton, crop conditions in western Canada continue to be of a favorable nature, according to reports received by the Canadian National railways for the weekly period ended July 8.

Job printing in first class style at The Review office.

Morrison Says Group Govt. Has Never Been Tried

BROADENING OUT POLICY MUST START FROM INDIVIDUAL AND NOT AT THE TOP—SAYS FUSION TALK IS POLITICAL

"Group government has never been tried." Declared this afternoon, J. A. Morrison, founder of the United Farmer movement, would not go when asked his opinion about Premier Drury's statement at Collingwood recently that "group government has failed." Mr. Morrison refused positively to be drawn into another controversy with the premier of Ontario regarding any public statements made by the latter. On the questions of "broadening out" and of entering into working agreements with the Liberals at Ottawa and in Queen's Park, however, he did have something to say:

"There is no such thing as broadening out at the top," said Mr. Morrison. "That must come from and start with the individual electors themselves. It is they who must and will have the first and the last say."

"Do not recent developments show that the political and the economic divisions of the United Farmer movement do not coincide and do not lead to the same goal?" he was asked.

"We have considered the movement in the light of politics and of economics separately," Mr. Morrison replied. "From the beginning we have stood along the lines of political economy. We only advocate political action as a means to an end and not as an end in itself. We hold, too, that the ultimate responsibility for political action rests with the electors in the individual and with them alone. Dictation of political action from any central organization would not be tolerated for a moment."

"What about this fusion talk?" he was asked. "What is all dependent upon the viewpoint. From the Liberal viewpoint it may seem quite proper and may seem to the advantage of the country that they effect some sort of an arrangement with the Progressives, but after all it is political, and not national considerations, that are uppermost in their mind."

Brutus Local to Give Prize For Attendance

The Brutus U.F.W.A. report twenty-one paid-up members and have a good attendance at the meetings. They also held the first and third Saturday of each month.

It has been decided to award a prize to the member having the highest record for attendance at the end of the year, also to award prizes to the pupils of the Golden West school, one prize for each grade.

Crerar May Join King Cabinet Is Ottawa Report

THINKS ONTARIO PROGRESSIVES WOULD FAVOR THIS MOVE — FIELDING TO RETIRE AND NEW APPOINTMENTS WILL BE MADE BEFORE NEXT SESSION

The Morning Albertan carries the following news item from its correspondent at Ottawa:

W. S. Fielding will not be a member of the King cabinet for very much longer says Walter Mitchell, high tariff financier from Quebec, friend and former associate of Sir Lomer Gouin, will not sit in session. It is not certain who will succeed him, but certainly it will not be Mr. Mitchell.

The Albertan correspondent has this information on very good authority. The newspapers, both Liberal, Progressive and Conservative, which have been saying so much about the domination of Sir Lomer Gouin have accomplished what they intended. Premier King is not going to give further excuse for the criticism that Gouin is in command by appointing a man who is closely associated with him.

The government would like to bring into the fold Crerar and Hudson of Manitoba. If they will accept a position in the government they will be in the government before another session of parliament. If they join the government it will mean the break up of the Progressive party. Many Ontario Progressives would support the government under such conditions and a few of the Manitoba members and possibly some Saskatchewan members. It is not believed that any of the Alberta members would follow Crerar to that length.

Gold has valued at $2,500,000 a rivel in New York on Wednesday last Thursday, consigned to J. P. Morgan and for the account of the British treasury, of which the Morgan firm is the finance agent. A similar shipment is also on the way on another steamer. While the Morgan firm said it was not advised as to the purpose of the shipment, it is believed in financial circles that the British government is accumulating a supply of gold here for the purpose of using it in part payment of the $125,000,000 interest on the war debt due in October.

It Works Wonders On Colds, Catarrh, Bronchitis, Weak Throat

When your throat rattles, your lungs and chest are sore, your throat is stuffed with cold—don't fear consumption—use Catarrhozone and get well. It clears the throat, stops hacking, relieves tight chest and soreness in the bronchial tubes. To clear away Catarrh of the nose nothing could be better. Catarrhozone is Nature's own remedy—it heals and soothes—removes every form of throat, lung and bronchial trouble. Prescribed by many specialists and used by thousands every day. Get the dollar outfit; it lasts two months. Small size, 50c; trial size, 25c; at all dealers or the Catarrhozone Co., Montreal.

MY CANADA

ELINOR MARSDEN ELIOT

Published by Special Arrangement with the Author

(Continued)

VI.

Elba,
June 21st, 19—

Once upon a time in the dim and distant past, when I was eighteen, I wrote a story and sent it to The Young Churchman. After several weeks it was returned to me, with a fatherly letter from the editor in which he regretted that he was unable to use it, because, "while it was of undoubted merit, it lacked serial value." I have since reached the conclusion that a story possessing serial value is one in which the chapters, like Sam Weller's valentine, pull up sudden so you wish there was more. Taking this as a standard, I feel sure that even the editor of The Young Churchman would commend what I wrote this morning. The credit is wholly due to Mrs. Mills, however, for she called me to dinner just at the psychological moment.

But to continue my chronicle of yesterday's happenings.

It was with fear and trembling that I descended to the dining-room. Mrs. Mills was coming in from the kitchen as we entered. In one hand she carried a platter of broiled chicken, and in the other a blue enamelled teapot.

"Just set down, Miss' Eliot, an' you too, Miss Arnold, an' eat your chicken afore it gets cold. I hope you both fancy fowl. I ain't got anywheres to keep meat in the hot weather, an' when company comes unbeknowst, I just pops out an' kills a rooster an' has a good meal ready in a jiffy. These here fowls were running around the yard as pert as you please half an hour ago. When I first come to Elba you couldn't get fowls for love or money, an' what eggs you could buy at the store had to have their necks wrung before you could cook them. I was raised back east where chickens an' eggs is as plentiful as dirt, an' so I soon changed that—made the desert to blossom like a rose as you might say." .

"Dinner ready?" interrupted a familiar voice from the kitchen.

"The young ladies are just setting down, Mr. Hartford," replied our hostess. "Don't wait to give your hands a rinse, even; this chicken's fit for a king now an' I want you to eat it while it's fresh."

Appetite Good, Gained 20 lbs.

Could Not Feel Better

From a nervous wreck this man was restored to health, strength and happiness.

He tells his own story in this letter.

Mr. Ralph A. Roberts, Loverna, Sask., writes:

"In 1917 I had lost all appetite, failed 25 pounds in weight, became very nervous and shaky and in fact given up all hope of recovery. For some time I had suffered from constipation, which kept getting worse, until I was fast becoming a total wreck. Doctors and their drugs were wasting me to my grave at the age of 39.

"Then I read about people being restored by Dr. Chase's Medicines and after three months' use of Dr. Chase's Nerve Food and Kidney-Liver Pills I found that my bowels were restored to normal movement each day and the constipation was no more. I had a good appetite, had gained 20 pounds and could not feel better. I shall always be grateful for these benefits."

Dr. Chase's Nerve Food, 50c a box; Dr. Chase's Kidney-Liver Pills, 25c a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto.

My heart was in my boots and Mary's eyes were dancing as the owner of the voice appeared.

"These here are Miss Eliot and Miss Arnold, Mr. Hartford," (Mrs. Mills had assumed her society manner, but she dropped it at once.) "Miss Eliot's the tall one with the pink cheeks—she's a countryman of yours, I reckon. An' the little one is from Arnold, sort of, she ain't right out of the same piece as them two young ones of mine you can call on Dinnie." And we found ourselves shaking hands with a middle-aged man instead of with the raw ranks we had expected. "Just make yourselves at home; I got some baking to do. Holler if you want anything." With this parting injunction the worthy Rebecca took herself off, and left me to do the honours of the table.

Mary's disappointment did not seem to affect her appetite—the way in which that chicken disappeared was a marvel. But a greater marvel still, Mr. Hartford went to Ortel with Father! What a small world this is, after all! And what a platitude that is! Of course Mr. Hartford is much younger than Father, and they did not know each other intimately; but in spite of these two drawbacks he made me feel that I had met an old friend, and almost before I was aware of what I was doing I had told him why I had come to Canada and what I intended to do while here.

And all the while I could feel Mary's impish smile, although her face bore the innocent expression of a cherub. One of her theories is that "an English girl will fall for a clergyman every time walk right up and eat out of his hand." I love Mary's metaphors.

Mr. Hartford is a singularly handsome man, with a grave expression that is contradicted by a humorous twist of his mouth and the twinkle in his grey eyes. Mary says that all he needs to make him a perfect saint is a romantic novel is a disappointment in love which has driven him to seek oblivion in the wild and woolly west. He may have a tragic past, though I doubt it, but the immediate cause of his sojourn in Canada was an attack of typhoid fever which left him unfit for work in his London parish. While he was still only convalescent he was reached by one of the periodic appeals of the Canadian Church for men to work in the mission fields, and as soon as he was able to travel he volunteered for a year. He has now been in Elba for six months, and every trace of his illness has vanished, the credit, he declares, being due to the Canadian air and sunshine and half to Mrs. Mills's cooking.

He knows the Flakes although they do not attend his church. He tells me that they are quite wealthy people in their position, but that they are uneducated—with the exception of the youngest child, a girl who has been to school in Winnipeg and who tries to give a polish to the manners of the family. A pleasing prospect for me, is it not?

"While we are gossiping about our neighbours," said Mary, "I want you us anything about the young man who brought us from the station?"

"Livingstone? Well, I don't know about him, for he is only here for a visit. He has a big ranch in Southern Alberta. But his wife's one of people—the other kind of Canadians." (This with a mischievous glance in Mary's direction.) "They are Presbyterians, but as the Presbyterians have only one service a day, they often come to St. George's in the evening. Mrs. Livingstone is a dear old lady, very proud of her descent from 'the MacDonaldis of Glencoe,' and prouder still of 'my son Ian MacDonald,' the Don of your acquaintance."

After dinner Mary and I decided to "do" Elba. As we were about to leave the house, Mrs. Mills called to us to wait for a few minutes and she would go with us as she had some shopping to do. With the promise of such a guide of course we waited, and in ten minutes the three of us were walking down Elba's main and only street.

By this time I had decided that it would be wise to tell our hostess my business in Elba, for I could see that she was consumed with curiosity. I shall never forget her expression when I told her that I was going to the Fiske farm as a working companion.

"Land sakes! I'm that flabbergasted that I well night swallowed my false teeth. You a working companion—why, that in plain Canadian means 'hired girl,' nothing more nor less. An' for Arabella Fiske of all people! When we were kids back east we used to go to school together, an' of all stupid creatures she was the worst."

After a minute's pause, during which a retrospective smile relieved her bewildered expression, Mrs. Mills continued:

"When we were older an' John Fiske come west, I wrote every last letter he ever got from Arabella. She couldn't write fit to be seen, nor spell, an' her grammar was something fierce. They had always kep' company more or less, but I declared to goodness that it was my letters what brought him to the point. An' just you mark my words, there ain't nothing like a little encouraging to bring a man around.

"I remember once Arabella come to me in an awful fix.

"'Rebecca,' says she, 'I'm scared to death that John is catching on! In his last letter he says that he hardly knows me in my letters—them being so easy an' conversational like.'"

"'But I says to her, 'Don't you fret none, Arabella; I'll make that all right.'"

"So the next time I wrote to John I says that I, meaning Arabella, am one of them mute unglorious Miltons what we used to have in our old Fifth Header, but that when I take my pen in hand my feet is on its native heath. Pretty good, wasn't it?"

"Lovely!" responded Mary enthusiastically, "and what did John say?"

"Oh," said Mrs. Mills, "he says that a mute unglorious Milton is just what he's been looking for, an' that spring was coming on an' he had hired a lot of men an' couldn't get a cook, an' would she marry him right away? I was their bridesmaid. They had a swell wedding.

"But here we are at the store. Walk right in and I'll introduce you to all the folks—nothing like being sociable in a small town."

Coming after Eastern's the Elba Beehive was something of a shock; but I must admit that it fitted in with my pre-conceived ideas of Canada much better than did the former place. In Elba, and I suppose in other small towns and villages, the "general store" is market, grocery, draper's shop, post-office, and pub, all in one. The shelves contain a varied assortment of goods; and the chairs, stools, and empty boxes are equally varied assortment of humanity. Of the last mentioned I was most interested in an Indian woman, and a small boy who was gazing with longing eyes at a glass-stoppered—and long unwashed—bottle which held deadly-appearing but evidently desirable sweets.

Papers to Paris by Airplane

A new early service of aeroplane delivery of London daily newspapers in Paris has been inaugurated by Messrs. William Dawson & Sons, Ltd. The papers now reach Paris between 8 and 9 in the morning.

The WISHING FAIRY

by Corinne

The End of Stella's "Make Believe" Story

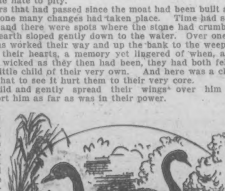
ONE HUNDRED years at least had passed since that day when the old man with the sack containing the most wonderful thing in the world, had turned the wicked Prince Carl and his wife, the Princess Elsa, into two black swans. The Castle that had been their home was now but a pile of ruins in which bats made their homes and in the fairy that grew wild over the turrets many generations of birds had lived out their happy little lives. The Swans still glided majestically over the quiet surface of the moat that surrounded what remained of the castle. They alone were unchanged from the wickedness that lurked in their hearts and the tears of hate that always flowed from their glittering yellow eyes into the moat.

One day, a day of gray and rain, a young woman dragged herself wearily along the road toward the castle, leading by the hand a little boy. The child stumbled more than once and the mother made every effort to carry him, but she was far too weak and ill, so on and on they struggled, when suddenly, by the edge of the moat, the woman lurched forward and fell. The child sat close by, and though he did not realize that he would never again hear his mother's voice or feel her tender arms draw him close, sobs burst through the little fellow's throat; great sobs of fatigue and loneliness. Too tired to walk, he crawled over to his mother's side, and through his tears he looked at her; for she seemed so strangely still. He tugged at her gown . . . usually when he did this there was some kind of an answer, if only a little wistful smile, but this time . . . she never moved! The little fellow crawled yet closer and tried to take his accustomed place in her arms, the warm loving arms that now were already beginning to feel so cold.

And through everything the two Swans, who were close by, were so quiet that they hardly rippled the surface of the water. They were watching all that was passing, but no longer was there a glitter of rage in their eyes, and no longer did tears of hate flow from their eyes for the rage had so suddenly changed to sorrow and the hate to pity.

During the many years that had passed since the moat had been built and bordered by its wall of stone many changes had taken place. Time had softened the wall with moss and there were spots where the stone had crumbled away and grass covered earth sloped gently down to the water. Over one of these spots the two Swans worked their way and up the bank to the weeping child, for deep down in their hearts, a memory yet lingered of kind, as the Prince and Princess and wicked as they then had been, they had both felt a great longing to have a little child of their very own. And here was a child in trouble, and such trouble that to see it hurt them to their very core.

They came to the child and gently spread their wings over him as though they would comfort him as far as was in their power.



Copyright, 1922.

As they did so a great light enveloped the little group and in less than a moment everything was completely changed. The castle was no longer a pile of vine covered ruins but stood as it had a hundred years before . . . even a flag trembled in the breeze from its turret! The two Swans were once more what they had formerly been . . . Prince Carl and Princess Elsa, but a prince and princess look at all wickedness, whose hearts were full of love and kindness, and in her arms the Princess carried the little boy. His golden curls fell over her shoulder and his eyes were closed in happy sleep. She now had a child of her very own!

Where the woman who had been his mother had lain, now stood the same old man (the Fairy in disguise) who had years back so cruelly punished the wicked Prince and Princess.

"Now that everything is once more as it should be," he said, "I shall leave you, for at last you know love and pity! My sack contains happiness, and it is now yours!" He and the great light disappeared leaving . . . all just as it should be!

"Well," and Stella smiled at her listening Brownies, "did you like my 'make-believe' story?"

But the Brownies couldn't answer. They were thinking.

WEAK HEART

NERVES BADLY SHATTERED

Many a woman who should be strong and healthy, full of life and energy is bound by the shackles of ill-health.

Some disease or constitutional disturbance has left its mark in the form of a weak heart, shattered nerves, impoverished blood and an exhausted condition of the whole system.

In

MILBURN'S HEART AND NERVE PILLS

they will find a remedy that will supply food for the exhausted nerves, one that will strengthen and regulate the weak heart and invigorate the whole system.

Mrs. W. W. Pearse, 14 Seaton St., Toronto, Ont., writes:—"I was left with a weak heart and in a run down condition from the "flu." My nerves were badly shattered, and I had pains around my heart I could not sleep much at night. I took several doctors' medicines without getting any better. My husband got me to try Milburn's Heart and Nerve Pills, and after I took one box I got relief, and after taking six boxes I have been well and not bothered since."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

One-Man Machine Gun

Can be Carried Same Way as Ordinary Rifle

The British War Office has recently been testing a remarkable machine gun which is so light that it can easily be carried by one man slung over his shoulder in much the same way as an ordinary rifle. This weapon is capable of firing from 400 to 700 rounds per minute according to the strength of the spring used. The weight, complete with mounting, is only 6½ lbs., and the inventor claims that there is no possibility of the cartridge becoming jambed in the gun. Lubrication of the mechanism is not necessary and the heat of the barrel does not affect the working in any way; in fact the gun will continue firing even though the barrel gets red hot. When the cartridge is fired gas passes through an aperture in the barrel into a cylinder and forces a piston backwards, thus operating a spring which brings another cartridge from the magazine into place.

Alcohol was first distilled by the Arabians, and when we talk about coffee and alcohol we are using Arabian words.

The architecture of a nation is an index of its civilization.

Nothing stimulates the digestion like KEEN'S DSF MUSTARD Freshly Mixed

The Simpler Life

Infuriated Suburban (to neighbor). —"Well, I'm warning you! You keep your dashed infernal bees out of my garden or, by thunder, I'll—I'll shoot them!"—Life.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callosity comes out without injury to the flesh.

Memorial Scholarships Awarded

Two memorial scholarships have been awarded by the Saskatchewan Government. Awards are made annually and the scholarships, which amount to $1,200, entitle the successful candidates to one year's tuition in any French University. They may choose their own subjects for study.

Attacked by Asthma. The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Care Taken of War Graves

President of Red Cross Society Expresses Appreciation

Noel Marshall, of Toronto, President of the Red Cross Society, upon returning to London from visiting the battlefields in France and Belgium, expresses himself as gratified at the expenses taken of the war graves.

Barnabas hostel, he says, is rendering invaluable service to Canadian visitors to the battlefields. Mr. Marshall suggests that Canadians going to France call first at the Red Cross Headquarters, 9, Waterloo Place, London, where they will receive every assistance in connection with their proposed tour.

Wireless waves all travel at the same speed, regardless of their separate lengths.

Bus Company May Install Radio Sets

New York Passengers Can Enjoy Programmes While Riding

Experiments conducted in New York show that it is possible to receive radio programmes on fast moving motor buses.

In the experiments, no antenna was erected and there was no trailing ground wire. The metal rail of the bus served as the aerial and the counterpoise grounding was accomplished by attaching the ground wire to the stairway rail. One of the company's employees held the receiving set in his lap while the bus was driven at a speedy at times exceeding 20 miles an hour. The programme received was from WJZ in Newark, N.J.

Further experiments are being made and the bus company is considering the installation of amplifiers on the buses with enclosed upper decks so that the passengers may enjoy programmes while riding.

Wigs made of white silk are the latest freak of Parisian fashion.

QUICK

You don't have to wait "to see if PE-RU-NA works" when you take PE-RU-NA. Before the first bottle is gone, you notice improvement. You sense the better appetite, sleeping soundness, Food digesting properly, tone of the system returning. Day by day you become more energetic, vigorous, "young" and the whole family benefits. PE-RU-NA is used as you continue—to build up health, prevent illness, to keep well. Almost before you realize it, you are well—PE-RU-NA is the ideal tonic and just what the whole family needs these days. Two generations can testify to the benefits they have received from taking PE-RU-NA. Its name is praised in thousands of homes, from coast to coast. If you want health, get a bottle of PE-RU-NA today and begin to feel better tomorrow.

PE-RU-NA COMPANY 244 St. Paul St., Montreal.

Had Your Iron Today?

Never Mind— Re-vitalize

YOU BET it's warm—the more need then for keeping the vitality up to par.

Vital men resist heat easily. Languid ones are floored. Re-vitalize yourself and you won't *mind* the weather.

The World's Largest Lifeboat

Will Carry 150 People and Many Useful Appliances

Arrangements have been made in Great Britain for building a new type of motor lifeboat which will be the largest of any yet known. Its length will be 60 ft. and its beam 15 ft. and its normal draught 4 ft. 6 in. It will be a 60-ton vessel propelled by twin screws, driven by two 75 horsepower oil engines, at a speed from 9 to 10 knots. It will be able to cruise for 100 miles without replenishing supplies. Two passenger cabins are provided, one at the bow and one at the stern, giving a total passenger carrying capacity of 150 people. Appliances are provided for supplying warmth and hot food and for rendering first aid to the injured. An interesting feature of the equipment is the provision of a searchlight and lifesaving net in addition to a gun for throwing a line over a vessel in distress. This vessel will be stationed on the Mersey.

Apple-pie Order

Few persons, when they use the phrase, "in apple-pie order," ever think of Hephzibah Merton. She was a housewife of Puritan times. Every Saturday the good woman baked a dozen apple-pies, which were to last her family through the week. These she placed in her pantry labelling one or more for each day. The pantry thus arranged was said to be "in apple-pie order."

With all due respect for Mrs. Hephzibah, one is inclined to think that her family must have got very tired of apple-pie.

From Halifax to Vancouver

Trans-Canada Highway Is Declared Objective of Automobile Association

A trans-Canada highway from Halifax to Vancouver was stated to be the objective of the Canadian Automobile Association by Dr. E. P. Doolittle, President of the organization, in his address at a Kiwanis Club luncheon held in Winnipeg.

Dr. Doolittle said the first and immediate aim of the Canadian Automobile Association was to be the designation of a road between Winnipeg and Vancouver. Later would follow the struggle for the route east of Winnipeg. Besides aiding those living along the proposed highway, Dr. Doolittle said tourists would bring money and prosperity to the towns and cities through which the highway ran.

Colic, Cramps, Stomach Pains Need a Quick Relief

Security against these sudden ills consists in always keeping handy a bottle or two of Nerviline. No family should ever go to bed unless Nerviline is in the house. It fulfills so perfectly every service as a pain remedy that once used, you'll never again be without it. Money can't buy much greater assurance against the many small ills that constantly arise in every family than you get in a 25c bottle of Nerviline. Sold everywhere.

A machine has been invented by means of which it is possible to produce sea air in the heart of a great city. It is being used in the treatment of various diseases.

New Radio Companies in Alberta

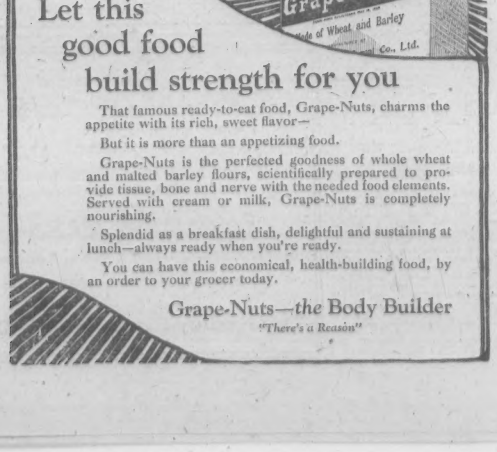
As a result of the radio-phone popularity which has swept the length and breadth of the province, three new radio companies have been organized and have become incorporated under the joint stock companies act.

A GOOD MEDICINE FOR THE BABY

Nothing can equal Baby's Own Tablets as a medicine for little ones. They are a laxative, mild but thorough in action, and never fail to relieve constipation, colic, colds and simple fevers. Once a mother has used them she will use nothing else. Concerning them Mrs. Saiuste Pelletier, St. Damas des Aulaines, Que., writes:—"I always keep a box of Baby's Own Tablets in the house. They are the best medicine I know of for little ones and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Increase in Farm Land Entries

Entries for farm lands in Manitoba in the year 1921-22 totalled 1,045, or more than double the number taken up in the previous year, it is announced by the Dominion Lands Office. Soldier grants for 1921-22 were 168 and homesteads 877. The total for the previous year was 367. Entries for mining claims for the period under review were 1,787 all of which were for quartz mining. Twenty applications for petroleum and natural gas leases were filed. April returns show 56 homestead entries and eight soldier grants. April, 1921, totalled the same, but the ratio was reversed, there being 20 homestead entries filed and 44 soldier grants.



An Outfit That Will Soon Be Seen Everywhere

All hands are now extremely busy replenishing their wardrobes for the spring. And one of the most important items in this wardrobe is the spring suit. Shown here is a very charming suit of gray twill. The self-colored hand embroidery and the neat tailoring contribute to the trimness and distinction of this suit. A large straw picture hat laden down with cherries of different shades tops off a costume that will be very familiar in a short time.

The Oil for the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Eclectric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years, have been using it can testify to its value as a lubricant.

Large Revenue from Auto Licenses

A total of 2,448 automobile licenses were issued by the Manitoba Provincial License Department up to the end of April this year, according to statistics made public. Dealers' licenses to total 244, motorcycles 405, chauffeurs 2,394, sales representatives 171, and permits 3,642. Revenue for the department so far this year amounts to $294,104, it is stated.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and acts through the blood upon the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

Cash Value of Prairie Trees

Add Greatly to the Value of the Prairie Farm

Most interesting results have come from a questionnaire sent by the Dominion Forestry Branch, Ottawa, to scores of prairie province farmers who have been successful in establishing tree plantations with the help of the Dominion Nursery at Indian Head, Sask. One point in the questionnaire related to the increased money value of the farm properties as a result of tree planting. Some of the replies are as follows:

"I think the trees have added $1,000 to the value of this property."

"I consider a bluff like mine would add at least $2,000 to the value of any farm. In fact I would not live anywhere without planting trees out."

"I consider it adds $5 an acre in value to a farm where you have protection of trees."

"They have added to the money value of my property to the extent of at least $2,000."

"The very lowest value I could place on my trees would be $1,000."

"I consider that a windbreak adds thousands of dollars to a farm and I have told a large number of my neighbors this and not one of them could deny it."

A moving picture camera for taking pictures of surgical operations without interfering with the surgeons' work has been perfected.

The latest census figures show Canada's population to be 8,772,631.

Minard's Liniment used by Physicians

WORLD HAPPENINGS BRIEFLY TOLD

Lighting a match to investigate plaintive mews from a litter of kittens housed under a staircase, six-year-old Claire Gagnon, Montreal, set fire to her dress and was fatally burned.

The graduated stamp tax on checks contained in the budget was objected to at a meeting of the executive of the prairie division, Canadian Manufacturers' Association, here in Winnipeg. The tax is to high, it was claimed.

Dr. Vilhjalmur Stefansson, explorer of the frozen north, discoverer of a race of blonde Eskimos and alumnus of the University of Iowa, was awarded an honorary degree of Doctor of Laws, at the 1922 graduating exercises of the university.

Ralph Fitzgerald, B.Sc., Calgary, carried off third honors, and Ernest Dickie, Perdue, Sask., carried off sixth honors in the highest aggregate of all subjects of the year in the course for degrees of doctors of medicine and masters of surgery in the faculty of medicine of McGill University, according to lists just issued.

Henry Ford has intimated that he would run for president of United States "if the people of the country desire him to do so," but he "would refuse to spend any money to bring about his nomination or election," according to Wm. T. Kronberg, editor of a Dearborn newspaper and one of the leaders in the Dearborn "Henry Ford for President" Club.

Mrs. Lillian Russell Moore, wife of Alexander P. Moore, publisher of the Pittsburg Leader, and noted stage beauty of a score and more years past, died at her in Pittsburg after an illness of several weeks following an accident suffered while on shipboard when she was returning to this country from Europe.

Mr. Justice Turgeon, of the Saskatchewan Court of Appeal has been tendered and will accept the honorary degree of Doctor of Laws from the University of Ottawa. Judge Turgeon will be unable, however, to attend convocation when the degree will be conferred, and his degree will therefore be conferred in absentia.

The International Brotherhood of Railway Trainmen at Toronto, adopted a resolution protesting against the encouragement by the Governments of Canada and the United States and transportation companies of immigration from foreign countries, particularly the Asiatic countries.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Eclectric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conceded to be Infamed tissue which is quickly soothed. This oil removes and is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

A Sum in Addition

"Two and One is Shoe Polish," Little Pat's Answer

Little Pat started at school yesterday, entering the first grade. After he had come home his mother listened to many strange tales of the day's doings. But Pat's reports were not confined to his domain alone, for in the early part of the evening he was walking along the street near his home, when a grown-up friend stopped him.

Right away things started. No questions were needed. Pat was wound up like an eight-day clock.

"Say, I went to school today and gee whillkins, what a time we had. He teacher gie us a piece of paper dat was about a yard long and about a foot wide and she made us put numbers all over de place."

"What, a yard long and a foot wide?" asked Pat's friend.

"Yes," was the reply, and then the youngster measured off a distance of about 10 inches long and about three inches wide. That was Pat's idea of a yard and a foot.

"De teacher axed me if I cud count and I told her yes and I can add, too."

"What is one and one, Pat?"

"Two, and two and two is four and three and three is six," kept on Pat without a letup. He continued this until he reached seven and seven. He could not answer this.

The little fellow's friend then tried him on a lower number.

"What is two an one, Pat?"

"Shoe polish."

"What is two an' one?"

"Shoe polish, I said."

"No, two and one makes three."

"Ye can't tell me, mister, cus I know, two an' one is shoe polish."

Nothing could make Pat believe that two an' one was anything else.

Keep Minard's Liniment in the house

Ambassadors represent Great Britain in twenty-seven foreign countries.

J. BERTRAM SIMON, well-known photographer, of Tacoma, Wash., who says that since taking Tanlac with such good results he now knows why everybody is praising this wonderful medicine.

"When they told me about Tanlac it seemed almost too good to be true, but since taking the medicine I know for myself that all they said about it was so," said J. Bertram Simon, 1031 E. 46th St., Tacoma, Wash., a well-known photographer.

"I suffered from rheumatism in my shoulders for ten years and at one time had to go to the hospital. I was down in bed for months and hardly able to turn from side to side. I couldn't sleep and I don't believe I had a day free from pain. My appetite failed and I couldn't digest a thing properly. Gas made me have heartburn for hours after meals.

"In a very short time after I started taking Tanlac I actually felt like a new man. I am now entirely rid of rheumatism and my stomach is in first-class condition, while I have gained ten pounds and never felt better. I have recommended Tanlac to a number of people and I am always glad to say a good word for this remarkable medicine."

Tanlac is sold by all good druggists.

Inspecting Timber Properties

R. B. Pougher, capitalist, and Rev. Newall Dwight, of New York, accompanied by a well-known engineer of the same city, have left to inspect timber properties in the neighborhood of Port Renfrew, Port Alberni, and Nootka, B.C., with a view to purchase. Should they be satisfied it is their intention to erect sawmills and a pulp and paper plant.

Rural Route No. 1, Mascouche, Que.
The Minard's Liniment People,
Sirs:—I feel that I should be doing a wrong if I neglected to write you. I have had four tumors grow on my head for years. I had them cut off by a surgeon about fifteen years ago, but they grew again till about three months ago I had one as large and shaped like a lady's thimble on the very place where my hair should be parted, and it was getting so embarrassing in public that it was a constant worry to me. About three months ago I got a bottle of your liniment for another purpose and saw on the label good for tumors. Well I tried it and kept it for exactly two months, with the result that it has entirely removed all trace of the tumor, and were it not that they had been cut fifteen years ago, no mark would be seen. I have often been asked for this testimonial and you can use it as you see fit.
(Signed) FRED C. ROBINSON.
P.S.—I am a farmer and intend using Minard's Liniment on a mare for a strained tendon and am hoping for good results.
FRED C. R.

THE REDCLIFF REVIEW, THURSDAY, JULY 13, 1922.

THE WHEAT BOARD.

If there is no Wheat Board established in time to handle this year's crop it will not be the fault of Premier Greenfield and his government.

Mr. Greenfield is taking the steps made necessary by the action of the Dominion government in disposing of this question at the last session of parliament. Under the federal statute, action by two provinces is necessary before any attempt at forming a pool is made. Becaus eof this, Premier Greenfield lost no time in arranging a meeting with Premier Dunning of Saskatchewan. Both Mr. Greenfield and Attorney-general Brownlee went to Regina to discuss the matter with Mr. Dunning, and have returned to Edmonton to report the result of their visit to the other members of the cabinet.

If everythihng is satisfactory the next move will be to call a special meeting of both legislatures, when the whole questio will be more fully gone into. Of course it can be expected that no matter what proposition is put up by the two provincial governments, will meet with some opposition in both legislatures when they meet. This will mean delay. Then, again, whatever system is decided upon by the two legislatures concerned must receive the sanction of the Dominion government. As it is common knowledge that the Dominion government is not unanimous in any pool proposition so far advocated. It is only reasonable to assume that here again opposition and delay will be experienced.

However, there is no doubt that both prairie provinces and their governments are anxious to have the matter carried as far as possible and that done as quickly as possible, so as to be of some use to the farmers in the handling of this year's crop.

CABINET CHANGES

Rumors of a cabinet re-organization are current at Ottawa. Railway co-ordination and the appointment of a new board which will control the National railways is also talked of. In this connection the name of G. P. Graham, minister of defence, has been mentioned as a possible candidate for president of the new board.

Othe rimportant appointments such as senators and judges are also to be made, and as some of these will be filled by present cabinet ministers some changes in the cabinet is possible in the very near future.

LOST HIS HOLT.

De Valera, who used to be the favorite of a certain class in Ireland in their fight against Britain, has lost his old glamor since the advent of the Free State. His mixture of fanaticism, cunning and duplicity in contrast with the more manly qualities shown by his opponents, Collins and Griffith, has convinced the better element of Irish Home Rulers that his allegiance was more of a liability than an asset.

A handful of desperadoes male and female, and a horde of youthful adventurers still rally to this Spanish leader of Erin's lost cause, but his grasp on the people has been broken. Those who backed him mightily in the days of old have seen the error of their ways and are now solidly antagonistic. Their spokesmen are coming out boldly in scathing denunciation of his high-handed tactics and advising the faithful to uphold the Free State.

This, together with the fact that Ireland now has its own government, which many previously antagonistic are willing to give a fair trial, augurs well for the future peace and prosperity of Ireland.

A GOOD IMPRESSION

If there were any of those who attended St. Ambbrose church last Sunday evening, who have been neglecting their church duties for any of the scores of excuses usually heard, they must have had those excuses completely knocked out of their system by the kindly, straightforward honest talk given by Canon Hicks on that occasion.

Canon Hicks is a man of wide and varied experience. His travels has brought him in contact with all classes and conditions of people. For this reason he is in a position to deal fairly and authentically with the many problems with which the church and its people are confronted, and because of this experience his words fall with greater weight and significance.

There is no doubt he left a great impression on those who heard him last Sunday evening. Nor is there any doubt that his visit here will result in great good for the community.

SENIOR AND JUNIOR FOOTBALLERS WIN

Seniors Now Leading In League Race

DEFEAT CALLIES IN MEDICINE HAT AND GO TO TOP OF HEAP —HAVE HOPES OF RETAINING LEAGUE TROPHY FOR ANOTHER SEASON

Redcliff seniors added another win to their list by defeating the Callies in Medicine Hat last Friday evening by a score of two to one.

Both teams started with nine players, but it was not long before all the vacancies were filled up. The Callies won the toss and immediately opened the attack. After an unsuccessful attempt to score play was transferred to the other end, where the visitors also made several unsuccessful tries to locate the net. After several minutes of play at centre the Callies again attacked and forced a corner, from which Milroy netted for the home team. For the balance of the first period play was very evenly divided, both sides missing several opportunities to score and all playing a fairly strong game. Half time arrived with the Callies leading by a goal to nil.

With the advantage of the slight wind the Reds opened the second half with a determined attack. Visions of the possibility of retaining the cup appeared before the players, and the forwards gave the Callie defence no rest. Time after time they reached shooting distance and did not hesitate in letting go, but little McNish in the Callie goal was a veritable Jack-in-the-box, saving innumerable shots. These attacks could only have one result, and some fore nice work by the Red forwards resulted in Maskell giving the goalie no chance and equalizing the score. Both teams made strenuous efforts during the next few minutes to secure the lead and the leather was kept busily travelling from end to end. Getting well away again, some more good work by the Redcliff forwards resulted in the ball being nicely placed in the goal mouth, when Jorgenson had no difficulty in heading into the net.

The Callies were not done with, however, and gave the Redcliff defence a warm time for a few minutes. Jones, in the Reds goal, made the best save of the match at this stage. A great shot from the Callie left brought him full length with the ball, and it looked all Lombard street to a china orange on Milroy placing the Callies level. He failed to lift the ball over the prostrate goalie, and Jones was again able to save on the ground, while the defence got the ball out of danger.

Play was now even up to the end of the game, and no more scoring taking place Redcliff were returned winners by the score of two to one.

The win places the Cliff at the top of the league, but the ultimate winner remains to be seen. One thing is sure, however, Redcliff have secured their points, while the other teams have got to get theirs to beat them.

The crucial game takes place on the 17th, when the Vets meet the Indians. Should the Vets win they will be the leaders, but—

At 8 o'clock every morning, thirty-six transcontinental trains of the Canadian Pacific railway are passing across the continent, while at the same time thirty-six dining cars are serving breakfast. These trains include the famous "Trans-Canada," which makes the journey from Montreal to Vancouver, a distance of 2,885 miles, in the record time of 92 hours.

Juniors Tie For League Leadership

JUNIORS BEAT KNOX AND TIE FOR LEAGUE LEADERSHIP — MEET WASHINGTON ON FRIDAY NIGHT AT THE HAT, WHEN WINNERS WILL BE CHAMPS

Playing a much better game together than their opponents, the junior Reds football team on Monday captured two points from the Knox on the Hat ground. It was necessary that the locals should win this game in order to keep well in the running for the league trophy. The boys had this impressed on their minds, and they played a better game than they have been putting up lately. The first half was a nip and tuck affair, in which neither side were able to locate the net. The feature of this half was supplied by goalie Jones, who saved a red hot one at point blank range, when everything looked hopeless. He was knocked out in the attempt, but recovered and was able to keep on playing. The Reds team missed two or three good chances to open their account in this half, but were generous enough to make their wishing, and the half ended with the score sheet blank.

The Cliff boys were not long in making tracks for the home goal when the second half started, and for a time swarmed round the Knox goal, but the backs were stubborn and gave nothing away. However success was not to be denied. A free kick was given against Knox within nice shooting range, and one of the halves despatched the ball into the top corner of the net with a nice shot. This kind of disheartened the Knox team, but still they played pluckily, and paid a visit or two to the other end without doing any damage, though at one time they took three corners in quick succession. The Cliff boys were always playing the better game, and put the game away by adding a second, the game ending two to none in favor of Redcliff.

The result of this game puts the Cliff boys on a tie with the Washers for the first place in the league with one game to play. This incidentally is with the Washers, and takes place at Medicine Hat on Friday (tomorrow) night. It promises to be a humdinger of a game from the word go, and there is sure to be a big crowd in attendance. All of the Hat team are out for the scalps of the Reds, and as the Washers have improved out of all recognition since the season started, this game will no doubt be the tit-bit of the season so far as the juniors are concerned.

It is to be hoped that everybody who can will go down to the Hat on Friday night to cheer on the local boys. A good noisy bunch of rooters and the boys will think they are playing on their own pitch. What say? Let's all go and help capture the first cup in the junior division.

ENGLAND VS. SCOTLAND

The annual international game in connection with the Hat-Redcliff football league took place last night. Redcliff were well represented on the teams, Stratton, McLennan and A. Learmouth were on the Scotch line-up, and Maskell on the English side. In addition Lakey and J. Learmonth were chosen as reserves. All of the players will receive a cap as a momento of the occasion.

Will Drill for Oil in Alta. Near Sweetgrass

The first steps toward the development work of oil lands in the Sweetgrass arch, lying on the Canadian side of the international boundary, will be made this week, when active operations will be taken by the Coutts-Sweetgrass Oils, Ltd.

A. J. McLean, former minister of public works in the Alberta legislature, is president of the company, and associated with him as directors are C. R. Mitchell, former provincial treasurer; W. Livingston, oil operator, of Calgary, and A. L. Wood, of Taber.

At the present time the company's drilling equipment, which has been located at Okotoks, is being transported to the new fields, and a start will be made this week in drilling on the company's holdings. Their leases are located in the southeastern part of the Quarantine reserve, in township 1, range 16, east of Coutts.

OTHER REDUCTIONS IN FREIGHT RATES

In addition to the reductions in freight rates on grain decided upon just prior to the prorogation of the federa house, th railway commission has issued an order providing for a decrease of 7½ per cent on basic commodities, to come into effect August 1, according to advices received from Ottawa. This decrease will apply to forest products, building material, cement, brick, lime, plaster, potatoes, ores, pig iron and scrap iron. It will also apply to coal rates in Alberta amounting to about 20 cents a ton on coal shipments from Alberta fields.

GENERAL NEWS

It is officially announced that the casualties suffered by the National army in the recent conflict in Dublin was 16 killed and 122 wounded.

With the official nomination on Saturday of about 150 candidates to contest the 53 constituencies, the Manitoba provincial election campaign enters upon its final stage. Polling day is Tuesday, July 18.

Several of the forest fires which have been raging on Vancouver island for the past few days and which it is estimated have caused hundreds of thousands of dollars damage to standing timber and other property, were reported on Saturday morning to be under control.

Architects estimate that it will require four years to rebuild areas of Dublin devastated during the recent fighting, this not including replacement of the Four Courts building. The Irish Independent suggests a loan of $100,000,000 for the purpose of reconstruction.

Continuing attacks against race track gambling, the Toronto Globe points out that Ontario race track devotees wagered $56,000,000 at the tracks last year and expresse dthe opinion that this amount will be exceeded this year despite the 5 percent provincial tax.

Two men are missing and camp number 2 of the Comox Logging company, comprising headquarters and 14 houses, was totally destroyed Sunday when caught in the on-rush of the forest fire which destroyed Merville soldiers' settlement on Vancouver Island.

Major W. T. Blake, the British aviator who is attempting an aeroplane flight around the world, passed Egypt last week.

Hon. T. A. Crerar, leader of the Progressives, is in Winnipeg this week, attending a meeting of the United Grain Growers, of which he is president.

Only two persons in Canada had incomes of more than one million dollars during the fiscal year 1920-21, whilst 19 corporations paid taxes on incomes of more than one million dollars, according to a statement made in the House of Commons. The aggregate of incomes represented by the amount collected under the Income Tax was $912,410,428. There are 194,257 persons paying income tax in the Dominion.

PRESIDENT WOOD SAYS WHEAT BOARD MEANS MILLIONS OF DOLLARS

WOULD RATHER HAVE SATISFACTORY CO-OPERATIVE POOL —PERSONNEL OF BOARD MUST BE CAREFULLY CHOSEN...TO SECURE BEST RESULTS

"I would rather have a voluntary co-operative wheat pool than a wheat board," said H. W. Wood, president of board if it could be satisfactorily operated," in addressing the Calgary board of trade last Friday. Mr. Wood explained that the country is in the primary department as regards co-operative societies here, while a co-operative voluntary wheat pool would be of the high school grade.

He estimated a minimum saving of $35,000,000 could be affected by the establishment of a compulsory wheat board. But he thought there might easily be a saving of $125,000,000. The farmers, he said, wanted a wheat board because under the present system, when at its best it was not possible to get full value for the wheat. Mr. Wood illustrated his reasoning by a chart which showed the fluctuations. For example, he stated that in July 800,000,000 bushels of wheat will be harvested and 225,000,000 would be the average monthly consumption. In August 975,000,000 were harvested last year, 430,000,000 bushels in September and that gave a reserve of a billion bushels. In January the southern when teames in, say 300,000,000 bushels. The month that the supply was greatest in excess of the demand, the prices were forced to the lowest level. With a wheat board to control thesale, much of the fluctuation could be averted.

A decline of fifty cents per bushel would mean a loss to Canada of $125,000,000. Mr. Wood does not hold with the theory that fluctuations are caused by speculation, but wholly by marketing conditions. Last year when wheat reached the low mark of $1.02, the greatest amount of the wheat was sold. He estimated that from 60 to 66 percent was sold at the low figure, explaining that this was owing to fear on the part of the farmers that it would go lower and because the margins had been wiped out at he elevators so that the grain men had to unload the farmer's wheat to protect themselves.

The wheat board would have had ample storage made up of the elevators, both terminal and interior, and the farmers' grain bins, the latter being the cheapest storage of all. Even if we consider the extra cost for storage, Canada and not foreign countries is getting the benefit of this expense.

Objection had been made that the increased price of wheat would have been offset by the increased price of flour. But Mr. Wood contended that flour prices did not follow the downward trend as fast or to the same extent as wheat. If wheat had sold for $25,000,000 more, he could not see any logical reason why flour would have been any higher than it was. On the other hand, 205,000,000 bushels of wheat were produced in Canada but only 45,000,000 of this was ground into flour. "Should we reduce the price on the whole 205,000,000 bushels of wheat," he asked, "in order to make a doubtful saving on only 45,000,000? We want some system by which we can get value for our wheat. Agriculture is the basic industry of Canada, just as manufacturing is the basic industry of England. But we can never hope to sell wheat at value under the present system.

"I know there is danger from forming a board unless the personnel is right. Boards are often simply hospitals for broken-down politicians. We all know that the railway board under Judge Mabee was a real help to the farmers, but we all know what it has become.

"I do not see any reason why the prairie provinces, which produce most of the wheat, cannot form a board of their own. The Dominion government has made provision for the creation of provincial boards, but a union board on the trinity basis would be the logical solution of the question.

In reply to a question re financing the board, Mr. Wood said that at present the farmer borrowed from the bank and the grain when it went into the elevator under the board would be as good if not better security than before.

Canada's registration of motor vehicles for 1921 shows an increase of more than 50,000 over the previous year, according to government statistics. The total revenue from registration was $7,669,406.

The provincial riding of Sedgewick has a new rpersentative in the legislature for the first time since the riding was organized. It has always been represented by Hon. Charles Stewart.

Embargo an Issue In Next Election

Sir Arthur Griffith-Boscawen, minister of agriculture, reiterated that he would both speak and vote against the proposal to raise the embargo on Canadian store cattle. This statement was made to a deputation representing a number of provincial cities and consumers' organizations, which waited on Sir Arthur to learn, among other things, whether he intended to acknowledge that a pledge had been given that would be removed had been given.

The minister declined to admit that a pledge had been given and this brought from W. P. Neal, chairman of the cattle market committee of the corporation of London, the declaration that they now considered the time for argument was past, and action was the only means whereby the view of the country could be made to prevail. Therefore, with the enormous resources at their disposal, they intended to make the issue a cardinal one at the next election.

Dominion Will Aid Settlement in Alta.

The co-operation of the Dominion government's immigration and colonization service in the irrigation land settlement scheme about to be launched by the Alberta government has been promised. L. G. Charlesworth, chairman of the irrigation council, has returned from Ottawa, where he went into the matter with the federal authorities and secured their definite consent is give such assistance as may be possible in the carrying out of plans already made or in prospect.

Under this co-operative agreement the offices of the Dominion department at Great Falls and San Francisco will be at the disposal of the provincial organization as centres from which the colonization work may be carried on in the western states. Literature descriptive of the Alberta lands will be sent out from these offices, and prospective settlers will in as many cases as possible be interviewed in person.

The British Columbia government is clearing over two million dollars a year in the liquor business. They must have received their training in Alberta drug stores.

The winning of the three bye-elections by the Progressive candidates may be taken as proof that the Farmers' government is still popular in this province. So far there has been no sign of any rift in the party, and the rank and file appear to be well satisfied with progress made so far.

WEEKLY NEWS BULLETIN

Issued by Publicity Commissioner, Government Buildings, Edmonton

Agricultural Representatives

Following a clear-cut outline by H. A. Craig, deputy minister of agriculture, of the policy of the Provincial Department of Agriculture with respect to the development of a system of agricultural representatives throughout the province, which made it plain that the department would develop this policy only so fast as experienced, capable men were obtained to fill the posts, The Alberta branch of the Canadian society of Technical Agriculturists passed a resolution endorsing this policy, at a gathering held Tuesday in the board of trade rooms at Calgary. The resolution was proposed by D. Ward Jones, manager of the Alberta stock yards, and seconded by Dean E. A. Howes, of the college of agriculture.

The system of agricultural representatives, developed to a considerable extent in other provinces and countries, is practically in the beginning in Alberta, three of these representatives being now in the field. The agricultural representative comes into intimate contact with the farmers of his district and aids them in solving their own peculiar problems. He is supplying what Dean Howes calls the "missing link" in agriculture, namely, the medium by which th epersonal contact can be established between the department of agriculture, the college of agriculture and other such agencies working along administrative and technical lines, and the ordinary man on the farm.

Deputy Minister Craig said that the department had perhaps been criticized in the past for its slow development of this system, but there had been method in this. He had long been convinced of the futility of putting young, fresh college graduates on such work and of the importance of having experienced and practical men with ability and good judgment in the positions of representatives of the department. He made it abundantly plain that it was the firm intention of the department to establish these representatives only as fast as it was able to get the proper kind of men to fill the positions. There were only three at present, Mr. Scott at Sedgewick, Mr. Freng at Lethbridge, and Mr. Murray at Medicine Hat. Speaking of what could be accomplished by the district representative, Mr. Craig referred to the work of Mr. Scott in Sedgewick, where he had been working for five years, and where he had been able to turn what had been a purely wheat-growing country into one which raised a very fine class of live-stock. Mr. Scott had been particularly fortunate in his personal contact with the farmers of his district, and had developed this partly through school work among the children, work at agricultural fairs, and in other ways. Mr. Craig referred to the work of Mr. Freng at Lethbridge, where the double problem of irrigation and dry farming existed, and quoted instances of what some farmers in that district had accomplished. He referred to the instance of the farmer in the Lethbridge district, who had had a gross income of $6,000 from a quarter section of land, had fed some dairy cows and fed a band of hogs, and still had some feed to sell after that. If we can find men like that who have made success, it is our hope to make them patterns for others, Mr. Craig also referred to Prof. Murray, who had recently taken over the duties of district representative at Medicine Hat where there is a great field for work for a man with Mr. Murray's qualifications.

He referred to the selection of S. G. Carlyle as supervisor of these agents, he being a man who had himself made a success in agriculture. "This country should not be considered as one which will make great fortunes f... but one in which a comfortable good living can be made on the farm if fair principles are considered," declared Mr. Craig.

During his address Mr. Craig took occasion to refer to the marketing machinery being developed by the department of agriculture. Something had already been done in this way in the matter of the marketing of dairy and poultry products, and now the department, co-operating with the University of Alberta and the Dominion Government, was laying plans to develop the marketing of Alberta seed, since no country in the world was better suited than Alberta for the raising of pure seed. He outlined the plans which were announced a week ago.

In concluding, Mr. Craig said the department would always welcome constructive criticism from the agriculturists, and he appealed for their sympathetic co-operation and assistance.

To Standardize Coal

A decision to adopt some system of standardization of Alberta coal, in order to facilitate marketing, was reached at a conference of coal operators of the province with Premier Greenfield and officials of the government, which was held at the government buildings on Monday. The conference was called by Premier Greenfield to discuss standardization and marketing. The President of the operators he was prepared to do anything he could to improve the marketing conditions of Alberta coal, but there were several problems to be solved, and standardization was one of them. A committee of 12 will be appointed to deal with the question of standardization, and will include three men each from the Edmonton, Drumheller and Lethbridge fields, and three from the other fields of the province. It is expected the committee will be ready to report in about two weeks' time. Other problems of marketing will be discussed. For some time the government has had a campaign in progress in Manitoba to increase th emarketing of Alberta coal there, and has met with some success. Geo. Pratt, government fuel engineer in charge of the demonstration at Winnipeg, gave the conference one of his illustrated lectures demonstrating the proper methods of firing Alberta coal. Premier Greenfield pointed out that Alberta must develop along two chief lines, namely, agriculture and the coal industry, and attention must be given to the marketing problem.

Tenders are now being called for by the public works department for the erection of two new buildings for the hospital for insane at Ponoka. One of these will be a dormitory, with accommodation for 200 patients, and the other a dining hall to seat 200 persons, the two to cost in the neighborhood, it is estimated, of $250,000. Both will be of brick and tile construction and practically fireproof. It is the intention of the department to put the work through as rapidly as possible, in order to have both buildings covered in by the beginning of next winter.

Another barracks building for the provincial police has been decided upon and will be built during the summer. It is to be for the Blairmore detachment, and negotiations are now under way for a suitable site. Tenders will be called for, it is expected, in about ten days, the provincial architect being now at work on the plans.

* * *

New Hospital Districts

A new municipal hospital district has been created to include municipal districts 278, 279, 308, 309 and the village of Three Hills. A vote will be taken shortly on the question of adding to the Drumheller district, a portion of municipal district 278, and the village of Carbon. The organization work for the new muniripal hospital district at Athabasca has been completed, and arrangements are to be made for the transfer of the present hospital building and equipment, which is to be presented to the new hospital district as a gift from the Victorian Order of Nurses.

* * *

Walter Smitten, the new provincial labor commissioner, has taken up his new duties and has been provided will offices in the Terrace building near the main government buildings. Mr. Smitten's first duty will be to make investigations relative to the co-operationalism of all labor legislation of the province.

* * *

In charges laid under the Liquor Act and Inland Revenue Act recently at Waterhole and McLennan against two men, sentences of six months and three months on separate counts were imposed on each of the two men found guilty of moonshine operations and bootlegging. The two men were given the option of paying heavy fines, but decided to serve the gaol sentences imposed.

The decision of the provincial legislature to again shift the settling of the gas question to the chairman of the utilities commission, makes it look as though it will be some time yet before the question is ultimately disposed of. It is hoped the delay and the change will work out to the interest of Redcliff.

SOLDIER JONES DEFEATED

RAILROAD "Y's" CELEBRATE ANNIVERSARY

(1) Canadian Pacific Y building at Revelstoke, B.C.; (2) A group of secretaries in connection with this branch of the service who held a recent conference at Kenora; (3) The C.P.R. well-equipped building at Kenora; (4) Cranbrook, B.C., a well-equipped Y with a large and active membership; (5) Schreiber, Ont., is another point at which a railroad "Y" is established.

A CLUB that is popularly known as the "greatest workingman's club in the world," celebrated its semi-centennial Sunday, June 11. That day was a memorable one for the 125,000 railroad men who compose the membership of the 269 railroad associations of North America. That date was the fiftieth anniversary of the birth of the railroad department of the Y.M.C.A. This jubilee was observed in many small, as well as in most of the large railroad centres, not only in the United States, but at the various points in Canada where railroad "Y's" are established. The participants were both railroad employees and executives.

"Y" work has been carried on in eastern and western Canada by the Canadian Pacific Railway for the benefit of its employees for the past 15 years with satisfactory results. The general public has little conception of the stupendous contribution being made by the Canadian Pacific Company to the moral, physical and recreational welfare of its employees and their families, through the whole-hearted support the company is extending to the railroad "Y's."

The Canadian Pacific has established branches of the association at Ignace, Kenora, Chapleau, White River, Schreiber, Field, Revelstoke and Cranbrook. The company provides the building, gives a cash donation of $100 a month, as well as providing ice in the summer and fuel during the winter months.

The railroad Y.M.C.A. buildings are open day and night for railroad workers. An effort is made to provide comforts and stimulating programmes for the moral and mental development and physical recreation. The objective of the association is to provide a homelike place "at the other end of the run," to insure proper rest, wholesome environment and stimulus to the qualities that make for sound character in all activities the steadfast aim is to develop the highest type of sportsmanship.

Own Your Home

A campaign that is worthy of support, and one it is to be hoped will prove largely successful and be persisted in from year to year, is now in progress in quite a number of cities and is finding prominence in the news and advertising columns of the daily press. It is a campaign of publicity to educate people as to the wisdom of taking steps to acquire a home of their own instead of remaining "renters" all their life.

While such a campaign can probably be carried on more spectacularly and effectively in the larger centres of population, it is one that might well be extended to towns, villages and hamlets, and, what is of even greater importance, to the strictly rural communities.

Nothing is quite so well calculated to give stability to a nation as to have its citizens, to as great an extent as possible, the actual owners of the dwellings in which they reside. When a man or woman has a stake in his or her country, province, and local community in the form of a piece of land owned by them and upon which they have established their home, certain very desirable results follow.

In the first place, such persons are far less likely to be influenced by demagogic appeals of agitators designed to undermine the stability of the state and shake public confidence in national institutions. The person with a fixed stake and interest in the country will give second thought before embarking on a rash enterprise, whereas people having no such interest in the country are more easily led astray by the professional trouble maker.

Ownership of a home constitutes a powerful factor leading to permanence of population. It is the man having no real interest in a community, as evidenced by lack of his own home, who is here today and gone tomorrow. It is the renters of the world who are forever on the move and who because of a lack of a stake in a given community will likely keep on moving and never amass anything.

People living in rented premises are paying the landlord's taxes for him, a good rate of interest on his investment, thus yielding him a profit and in the long run actually paying for the property. The amount thus paid out annually in rental would in the course of years pay the purchase price and the result shortsighted renter have an asset to show for his money.

The family living in a rented house inevitably take less care of the property than would be the case if it was their own. They do not exert themselves to anything like the extent an owner would to improve and beautify the property, with the result that communities where renters predominate do not present the same prosperous, go-ahead appearance which marks a community of home owners. The incentive to steadily add to the value of the property is lacking; on the contrary, the opposite effect is too frequently noted because improvement of the property by the renter may easily result in a demand from the landlord for a higher rental.

What is true in the case of the resident of a city or town is equally true of the renter-farmer as contrasted with the farmer-owner. It is the renter who strives to get all he can out of the soil during the usually brief period of his sojourn on the land. He is not concerned about the future, with the result that the land and buildings deteriorate and the community, province and country suffer loss.

It is gratifying to learn, therefore, from statistics recently compiled that no other country in the world shows such a high proportion of home owners in the larger cities as does the Dominion of Canada, and in this respect the cities of Western Canada are ahead of those in the Eastern provinces. It is probably true, too, although figures are not available, that in respect to ownership of land by farmers who are tilling the soil Canada occupies a higher places than other countries. The majority of farmers in Canada are owners, not renters, but there appears to be a tendency in this country—and to an even more alarming degree in the United States—for renters to increase in number. Great Britain has realiad the mistake of having huge tracts of land owned by the few and the great majority of agriculturists reduced to renters. Now the great English estates are being broken up, and many farmers are thus being enabled to secure land of their own.

Here in Canada the stability of the state, the securing of permanence of population, the improvement and permanent development of property, and the maintenance of a high standard of living all call for the giving of every possible encouragement to people to become the owners of homes of their own. Buying or building a home is good business for the individual as well as for the state. "Own Your Home" should be the ambition of every Canadian.

Personally Conducted Tour

Exceptional Opportunity Offered for Visiting Pacific Coast

The Canadian National Railways are arranging a personally conducted tour from Winnipeg to the Pacific Coast. Leaving Winnipeg on June 30th, at 11.30 p.m., the train will connect with a G.T.P. steamer from Prince Rupert on July 6th. Stops will be made at the following points of interest en route: Watrous, Saskatoon, Wainwright, Edmonton, Jasper, Mt. Robson, Prince George, Kitwanga, Terrace, Prince Rupert, Vancouver, Victoria and Seattle. There will be made available a choice of routes for the return trip. Get in touch with any agent of the Canadian National Railways for full particulars regarding this tour, or you may write to W. J. Quinlan, District Passenger Agent, C.N.R. Winnipeg. The arrangements made in connection with this tour will ensure perfect comfort and the acme of perfection in travel.

The Man Who Works Hard Should Follow This Advice

Perseverance and—will power he would have, but whether he has strength and vigor is another question. Hard working men often have headaches and suffer from bilious fits. The occasional use of Dr. Hamilton's Pills keeps a man feeling fit and fine, keeps him always at his best. Headaches, indigestion, poor color are quickly remedied by Dr. Hamilton's Pills. Dr. Hamilton's Pills keep the system clean and pure, tone up the blood, drive away tiredness and lassitude. No medicine for men is better than Dr. Hamilton's Pills, 25c all dealers or The Catarrhozone Co., Montreal.

Very Particular

Hotel Clerk.—Will you want a private bath?

Wayback.—Yes, I don't fancy those swimming pools.—Judge.

LINGERING WEAKNESS FOLLOWING DISEASE

Due to the Fact that the Blood has Become Thin and Watery

In almost every case the victims of la grippe, influenza, fevers and contagious troubles are left weak, ailing and dependent after the disease itself has disappeared. They do not pick up strength as they ought, and remain tired, listless and discouraged. The only reason for this is that the blood has been impoverished by the ravage of the disease through which the victim has passed. Strength and full activity cannot return until the blood has been restored to its normal condition. The blood can be enriched and purified quickly and surely by Dr. Williams' Pink Pills. To enrich the blood and strengthen the nerves is the whole mission of these pills, and thousands have found them beneficial after disease had left them weak and run down. Among those who have proved the value of these pills in cases of this kind is Mr. Charles A. Turner, light-keeper Thrum Cap light station, N.S., who says:—"In Jan., 1917, I took a severe cold which I neglected until it developed into pneumonia, which confined me to bed for some weeks. When I was able to get up and sit around the house, I found that I was not regaining my usual strength; in fact I seemed to be growing weaker and was reduced almost to a skeleton in appearance, but it did not help me. Then one day a friend who came to see me said, 'Here's some Dr. Williams' Pink Pills; just the thing to put you on your feet again.' I took them and then got six boxes more and soon could feel they were helping me. By the time the last box was empty I was doing my work again and feeling fine, and I had gained in weight. My health has since continued good, and I give the credit to Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box, or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Millions Ready for U.S. Interest

Britain Prepared to Meet Payment Due in Autumn

The Government has completed arrangements to pay, during the coming autumn, interest amounting to $125,000,000 on the British debt to the United States. It has not yet been decided whether a special mission will be sent to Washington to discuss the debt with the U.S. Government.

It is stated in British quarters that the feeling in the United States is believed to favor the negotiations for the funding of the allied debts being undertaken with Great Britain first she being the principal debtor. A model this would be applied for subsequent negotiations with other countries.

Will Erect Statue of Currie

A statue of General Sir Arthur Currie, who led Canada's overseas forces in the war, probably will be erected in Victoria in the near future.

More Women than Men in Europe

Twenty-five million women in Europe are condemned to single blessedness for, according to statistics, there are 1,111 women to every 1,000 men on the continent and in the British Isles. Of the 475,000,000 people more than 250,000,000 are women, so the number of women now exceeds that of the men by 25,000,000. Before the war there were only 9,000,000 more women than men.

A very rare gas in the air is neon, of which a room contains but a teaspoonful or two. It is used for filling bulbs required to give an orange-colored light.

Minard's Liniment Lumberman's Friend

LET GILLETT'S LYE DO IT

Make it your handy household assistant. Use it for making soap, in washing dishes, for cleaning sinks, refrigerators, garbage cans, etc., for cleaning clogged drain pipes, for removing grease and smoke stains, for scrubbing floors and tiling. You will find that the systematic use of Gillett's Lye will keep everything around the kitchen and bath room clean, sweet and wholesome. Cleans and disinfects. Is economical and sure in its effects. Has been the standard for over 50 years. It saves labor, time and trouble.

EATS DIRT

At the Railway Crossing

Trains Get You Going, Coming and Standing Still

Railroad crossings are places where automobile drivers turn around and visit with the people on the back seat. They frequently become gold mines by this process. Sometimes it is hard to distinguish one from another after the train has gone by. The driver is always easy to pick out. He is the one with his face turned away from the railroad track.

Many people are of the opinion that the highway crosses the railroad tracks. That is not so. The railroad track always crosses the highway. Some railroad tracks run four abreast. Their percentage of hits is higher than the single-track variety. It gets them three ways—going, coming and standing still.

Wise mothers who know the virtues of Mother Graves's Worm Exterminator always have it at hand; because it proves its value.

Aviator Establishes Endurance Record

Flew from London to Paris Twice in One Day

Captain E. D. C. Horne, who is piloting one of the new D.H.34 "express" on the London-Paris airway, succeeded in establishing a new endurance record in commercial aviation. Leaving the London air station at Croydon for Paris at 6.55 a.m., Captain Horne flew to Paris in 123 minutes. After half an hour's rest he flew back to Croydon, arriving there at 11.54. Snatching a hasty luncheon, he was in the air again—still in the same machine—at 12.45 p.m., and alighted at Paris at 2.58 p.m. Spending only 22 minutes on the ground at Paris, he returned to Croydon at 4.40 p.m.

Within 11 hours Captain Horne piloted the same aeroplane 1,000 miles, his "flying time" being 8 hours 52 minutes. It is the first time that one pilot has flown to Paris and back twice in the same day.

The previous best performance was that of Captain Shepperson, who, on the day of the French Grand Prix in 1920, flew from London to Paris in the morning, back to London again after luncheon, and then back to Paris once more before dusk.

Settlers Bringing in Money

Settlers who arrived in Winnipeg during the month of April, 1922, numbered 1,254, according to a statement issued by Thomas Geley, Commissioner of Immigration. Their effects were valued at approximately $187,297, and they brought with them $353,932 in cash.

Steel window shades which drop when the display window glass is broken have been installed in some western stores to foil burglars.

Where Settlers Come From

A statement compiled by the Department of Immigration and Colonization shows that for the month of April 2,563 immigrants entered Canada from the United States, and 2,330 from other sources. Of the settlers from the United States, the State of Michigan contributed the largest numbers were from Arizona and North Carolina, with one each.

Miller's Worm Powders are complete in themselves. They not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speedily recovers from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

Says Empire Must Retain Sea Power

Lord Lee Gives His Opinion on Maintaining Navy

A number of prominent people have sent messages to the special June number of the Empire Mail. Lord Lee, First Lord of the Admiralty, has a message saying that in these days of financial panic and economy at any cost, it is well to remember the unchanging fact that the security of trade and commerce, the continuance of food supplies and the very existence of the empire are dependent on the maintenance of sea power and an adequate and efficient navy.

Horticulturists Organize

The Canadian Council of Horticulture has been organized as a result of a meeting held at Ottawa. The council will afford representation for fruit growers, vegetable growers, wholesale fruit and vegetable dealers, florists, gardeners, jam manufacturers and others generally interested in fruits and vegetable production. The first president is Colonel H. L. Roberts, of Grimsby, Ontario, and the secretary-treasurer is L. F. Burrows, Assistant Fruit Commissioner, Ottawa.

Western Rye Grass Proving Very Important To Prairie Farmers

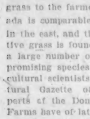
The importance of western rye grass to the farmers of Western Canada is comparable to that of timothy in the east, and the fact that this native grass is found in a wild state in a large number of forms makes it a promising species for study by agricultural scientists, says The Agricultural Gazette of Canada. The experts of the Dominion Experimental Farms have of late given it more systematic attention than any other grass and the results that are likely to follow their investigations promise to be of great practical importance. In his report for 1920-21, Dr. M. O. Malte, until recently the Dominion agrostologist, announces the discovery that this grass is normally self-fertilized, whereas grasses in general are open-fertilized. The fact that wheat is self-fertilized has made possible the production by scientific breeding of improved varieties such as Marquis. Now that it has been established that western rye grass is normally self-fertilized, it will be comparatively easy for the hybridist to originate countless new varieties which will be constant in their characteristics, or in other words, will breed true to type. For this work the plant breeder already has at hand in nature a large number of different types of this grass to work with. By combining and recombining the various characteristics found in them, new varieties can be produced, which will remain constant from one generation to another, and from which selections may be made. In the pursuance of this work a number of wild forms have been collected from practically all of the provinces. Plots from these were established, with the result that last year some 150 lots of western rye grass were being grown at Ottawa for the purpose of studying their relative agricultural value. In 1920, seven varieties were sent for further test on the prairie farms, while in 1921 five additional varieties were sent out to the same farms.

Between these varieties an astonishing difference in yielding power has been already observed. The fact that, in 1920, one gave only 15 pounds of ounces of straw and seed from 300 plants, while another produced 109 pounds 5 ounces will indicate the wide range of productiveness. Results for 1921 are not complete, but the difference in yielding capacity of various varieties was even more striking. It is well within the mark to say that the maximum yields were more than five times as great as the yields of varieties commonly grown. Analyses made by the Dominion chemist to determine the varieties having the highest percentage of nutritive constituents show that the difference in this respect is also very marked. The inference is that by this simple propagation of the high yielding variety and its introduction to agriculture the increased productiveness of this valuable plant would correspond; and it should be mentioned that one variety which showed up particularly well in 1920 was sown in 1921 in a field plot for seed propagation. The field of cross-breeding has not yet been entered upon, but apart from that, the above facts are in themselves of the greatest significance to western farming.

PAINS IN BACK AND SIDES

Relieved by Lydia E. Pinkham's Vegetable Compound

Lindsay, Ontario.—"I used to have very bad pains in my back and sides and often was not fit to do my work. I tried many medicines but found no help. I began to take yours. I now take Lydia E. Pinkham's Vegetable Compound advertised in the 'Toronto Globe' and now that it has helped me I recommend it to all of my neighbors. I keep it in the house all the time and take it once in a while no matter how well I feel, for one ounce of prevention is worth a pound of cure." —Elizabeth Campbell, 13 St. Paul St., Lindsay, Ontario.



To do any kind of work—and you know there is much to be done—is next to impossible if you are suffering from some form of female trouble. It may cause your back to ache or a pain in your side. It may make you nervous and irritable. You may be able to keep up and around, but you do not feel good.

Lydia E. Pinkham's Vegetable Compound is a medicine for women. It is especially adapted to relieve the cause — these troubles, and restore them to normal health.

N. U. 1424

Want Standard School Books

United Order of Canadians Request Use of Dominion Authors' Works.

A resolution calling for the standardization of the text books used in Canadian schools was unanimously adopted by the United Order of Canadians, at a banquet in Regina.

The resolution was to the effect that the organization is strongly of the opinion that the text books used in the public and high schools of Canada, on such subjects as literature and history, should be uniform and that a considerable portion of the selections in the school readers should be drawn from the prose and poetry of Canadian authors. The resolution added that the order noted with great satisfaction that the departments of education in the prairie provinces are taking steps in this direction. It further recommended that Canadian colleges and universities put on at least one course in literature which should deal with the works of native authors.

A copy of this resolution is to be forwarded to the Minister of Education in every Canadian province. The passage of the resolution followed a talk given by Professor Allison, Winnipeg, of the English Department of Manitoba University. He spoke on the value of educating foreign-born children, and the children of foreign-born parents, along Canadian lines, and thus causing them to grow up loyal citizens of Canada.

Whole World Invited

Nations Can Appeal to Court of International Justice

A notable decision was reached when the council of the league of nations threw open the court of international justice to the whole world, ruling that Russia, Germany, Turkey, Hungary and Mexico, the only countries which heretofore had been excluded from its benefits, could bring cases before the court. The only condition imposed was that the nation in question agree to accept the decisions of the court and not to declare war over the disputes in question. Little by little the world is coming to recognize something beyond the limits of personal aggrandizement, and nations one by one, are learning to accept some of the privileges associated with being "my brother's keeper." —Christian Science Monitor.

The Queer Greek

Everything in Country Done Contrary to Usual Way

The modern Greek has his own queer way of doing things. For instance, the Greek who wishes to call a friend to his side, makes a gesture which, anywhere else in the world would be interpreted as a wish to go away. When he actually does wish his friend to go away, he beckons. When one arrives in a Greek city he must not expect people to call on him, but must go all the way himself. And in addressing an envelope the Greek puts the "Esquire" before the name instead of after it.

But strangest of all is the fact that when a Greek says "nay" he means "yes." In almost all other languages the word beginning with "n" is the negative. But in Greek the affirmative is "nay," the same word as the English one with exactly the opposite meaning.

Need Help of Men

Women Seek Sympathy, Not Criticism, from Men, Says Miss Joan Arnold

Addressing the Canadian Club at Vancouver, Miss Joan Arnold said: "Women need the help of you men if they are to become good citizens; you must act as our elder brothers first in the school of life. We want your sympathy and assistance, not your criticism."

Some women, she proceeded, think they are going to remake the world at once, but the men and women who have thought about the matter know this is not to be the case.

"Most of us know we must look to you for help. Not that we think you men have made such a great fist of running the country, but you are all we have to look up to," the speaker concluded amid laughter and applause.

Will Extend Railway

Contracts have been awarded for extending the Lacombe and North-western Railway a distance of twelve miles from its present terminus. The road serves a prosperous and well settled agricultural district and the extension is necessary to afford better transportation facilities.

Canada's Oldest Industry

Annual Harvest of Wealth from the Fur Trade

There is only one industry which is peculiarly Canada's. It is the fur industry. Just now the skins which the trappers have taken during the winter are finding their way to the centres of the trade at Montreal, Ottawa, Edmonton and Vancouver, and by this time the traders and the hunters in the north will know how their balance sheets stand. For in no industry are returns so fluctuating as in the fur business.

Some indication of the deflation in the market value of furs is graphically illustrated in a report just issued by the Dominion Bureau of Statistics on "Fur Production in Canada, 1920-21." The very high prices which prevailed in 1919-20 resulted in a valuation of the fur product of that year of $21,387,005, whereas last year the output was valued at $10,151,594. This is an actual decrease in value of nearly 50 per cent., for the number of pelts was only slightly less.

In 1920-21 according to "Natural Resources" for May there were 2,936,407 pelts of wild fur-bearing animals, against 4,686,000 in 1919-20. Beaver was the principal pelt marketed in bulk value. 164,656 skins accounting for $2,686,472. Muskrat provided 2,015,481 skins, valued at $2,505,375, and came second in point of total value. Next in order came marten or sable, otter mink and the much maligned skunk, last named yielding 74,972 skins, valued at $130,130. Foxes, with six classified species, remained the highest priced furs, and silver fox, the aristocrat of the fur-bearers, bringing $151.99 for a single pelt.

From the foregoing it will be seen that an enormous toll is taken annually of Canada's wild animals in order to supply fair ladies and others with furs for apparel. Nearly three million skins every season means that the greatest care must be taken to observe the laws for the protection of these creatures and thus governing their hunting and trapping. If this is done, they will continue to give this annual harvest of wealth. For nearly a hundred and fifty years furs have formed the basis of Canada's oldest industry. It can go on for three hundred and fifty years more if humane and intelligent precautions are taken to give the animals at least a square deal in this old and romantic profession.—Ottawa Citizen.

Hard to Climb Everest

Thinness of Air Is Greatest Obstacle to Combat

The gallant little band of men who are to attempt to reach the summit of Mount Everest, the world's highest peak, will encounter dangers and difficulties of many kinds. A Canadian doctor, an expert mountaineer, is with the party this year.

The altitude to which they want to climb—Everest is 29,000 ft.—are, of course, perpetually cold, but they have a greater obstacle to combat in the thinness of the atmosphere.

The effects of the shortage of oxygen in the air are felt in many ways. Nothing can live without breathing apparatus to make up for the lack of oxygen in rarified atmosphere. But some scientists think that at high altitudes a man's powers are so impaired that he would be unable to carry the gas and apparatus.

It is true that, with the gas in cylinders, airmen have risen to very great heights, but it must be remembered that aviators are not called upon for great exertion. There is a vast difference between being seated at an aeroplane's controls, and struggling, deep in snow and laden with baggage, up a steep mountain side.

Another effect of the rare atmosphere is to cause water and other liquids to boil at much lower temperatures than at sea level, so that mountaineers find that the higher they climb the harder it is to make tea and cocoa, or to cook food. Water boils before it is hot enough to cook anything! The lack of oxygen also makes digestion very difficult, and climbers need easily digestible food in very small and frequent quantities.

You may wonder why the attempt to climb Everest has not been made by air. The reason is that the mountain is not an isolated peak, but is surrounded by high land for hundreds of miles, much more than the flying radius of aircraft.

This means that, although a plane could easily fly to the height of Everest, it could not fly towards it without alighting on this high land to refill its petrol tanks.

And when that had been done the plane, thanks to rarified air—would be unable to rise again. For, although the air on the surrounding ranges will support a plane in flight, it is not dense enough to "take off" in the propeller would, in effect, skid in every direction.

Scotland Yard has records of 200,000 finger prints, so perfectly classified that any special one can be found in one minute.

Some Queer Cargoes

Oddest on Record Was Two Million Gallons of Water

The oddest cargo recorded, according to a London paper, was probably that carried lately by a British steamer bound for Morocco.

It consisted of some two million gallons of water. To carry that amount of water a distance of fifteen hundred miles sounds too absurd, but the matter becomes clearer when we are told that the water was specially purified drinking water for the use of the Spanish troops fighting the rebels in Morocco.

Another cargo sent to Spain consisted of an immense quantity of bank notes. There were several millions of these, most of them of small value. It is testimonial to British printing that Spain gave such an order, and is due to the fact that notes printed in Spain have been so largely counterfeited.

A master stevedore, working at the Albert Docks, London, recently received compensation for being hit on the head by a bundle of old horse shoes which were being loaded into a steamer's hold.

In court the judge asked the reason for sending old horse shoes out of the country. Counsel told him that they were made into spades, a purpose for which they were specially suitable.

Speaking of export to the east, there is a certain English firm which, in the course of its ordinary business, produces large quantities of waste spelter and lead. This material is melted up, run into moulds, and exported in the form of images of various eastern gods.

Richest Man in Ireland

Lord Pirrie Says Pluck is Worth More Than Luck

An ounce of pluck is worth a ton of luck. This is the favorite maxim of Lord Pirrie, the richest man in Ireland, who celebrates his seventy-fifth birthday today. Beginning life as a shipyard apprentice, he now controls 40,000 men and is regarded as the leading shipbuilder in the world. He was born in Quebec, the son of Irish emigrants. His father died when the future shipping magnate was an infant and the mother returned with the boy to her old home in Ireland. At the age of 15 the lad entered the employ of the great Belfast shipbuilding firm of Harland & Wolff, and when only seven-and-twenty was made a partner. In due course he became chief owner of the firm, as well as a director in great steamship lines, railways, banks and other big enterprises. Lord Pirrie has served as Lord Mayor of Belfast and has had many other honors bestowed upon him.

World's Largest Plane

French Machine Will Carry Twenty Passengers and Luggage

What is claimed to be the world's greatest biplane has just concluded final tests at the Orly aerodrome and will shortly begin trans-European flights. It may be used in a new attempt to cross the Atlantic in the late summer. Of Farman construction, it has four propellers, four 400 horse power motors and a wing spread of over 100 feet.

According to the airman, Boussotrot ,the well known pilot of the Goliaths who will fly the new giant, it will be able to maintain a speed of 100 miles an hour while carrying 20 passengers and luggage, a total load exceeding seven tons. Although designed for passenger service, experts who investigated the machine at the Salon d'Aviation, stated that it would be an ideal weapon for bombarding cities from a great height.

Foreign Trees Grown in B.C.

A special feature which has made its appearance on the municipal market at Vancouver is young English and Japanese walnut trees, one year old, grown in British Columbia.

Midget European Kingdoms Preserve Their Independence Through Many Centuries

There are several little independent states in Europe and they art startling anachronisms in their way for they have somehow managed to preserve their identity and to escape absorption by their powerful neighbors all down the long centuries during which the continent of Europe has been swept time and again by successive waves of war and of revolution.

But so diminutive are they and of such a sturdy independence that it is difficult not to be just a little amused at them. They do so suggest baby states playing at being empires.

Take Monaco, for instance, and its eight square miles of territory, a delightful harbor measuring forty-two acres and a revenue derived entirely from the gaming tables at Monte Carlo. It lives under its own flag, issues its own coinage (only one hundred franc pieces, however), which is accepted in Latin countries, and also its own postage stamps.

The prince was an absolute monarch up to 1911, but in that year, he granted a constitution to his subjects and is now assisted in the care of state by a prime minister and a council of state. His diplomatic representatives are received at the courts of all the sovereign states of Europe.

Then there is Liechtenstein on the borders of Switzerland and Austria, which, however, is very extensive, not to say far flung, by comparison with Monaco, for it has an area of quite sixty-five square miles. But size is not grandeur and territory does not make a nation," as Professor Huxley once put it, and there are those who think that this diminutive principality which may well go to make it the envy of many a large and powerful state, for it has no public debt and no standing army, the inhabitants, who number more than ten thousand in 1912, being exempt from all military service.

The principal is hereditary in the male line and, like Monaco, the state is ruled over by one family for over a thousand years. Several times in the course of its history it has been under foreign control and indeed joined the German Confederation in 1866, but it has the same custom duties as France, so Liechtenstein is allied by treaty to Switzerland as regards customs, posts and telegraphs. The chief of the three members is elected on the basis of universal suffrage and proportional representation, so it is quite up-to-date in spite of the fact that the capital Vaduz has a population of only a thousand souls.

San Marino, in Central Italy, perched high up on a precipitous rock and approached by one single road only, claims to be the oldest state in Europe, which claim is disputed. It certainly has been independent since the early part of the seventeenth century, and it probably met with very little outside interference for many a century before previous to that, a republic of thirty-eight square miles, the reins of government is in the hands of a grand council of sixty members, and here again there is no standing army. But it has an army, the present strength of which is thirty-nine officers and 950 men. Its tradition rtaelies exist between San Marino and Great Britain, Belgium, Switzerland and United States.

But what is probably the oldest and most certainly the most interesting of all these curious political survivals of medieval feudalism is Andorra, the "Valleys of Andora," to give the official designation of a little state at the heart of the Pyrenees, situated amid some of the most magnificent mountain scenery in all Europe. It is larger than the others, having an area of 175 square miles and a population of about six thousand, and until the Trans-Pyrenean railway penetrated to it, a year or two ago, was so shut in by mountains and difficult of access that century after century passed without working any change in it. The archives, which are said to go back to Charlemagne's time, are kept in a cupboard in the wall of the primitive little council chamber.

It is more a seigneury than a republic, being under the protection both of the French government and the Bishop of Urgel, paying an annual levy to the former of 40 pounds and to the latter 18 pounds, but it is nevertheless recognized as an independent state, although it has no diplomatic representatives. It has, too, its own national flag. The government consists of a council of twenty-four persons. The posts and telegraphs are under French control, while the coinage is Spanish, the language spoken being Catalan. There are no customs, and if rumor is to be believed smuggling is the chief industry of the inhabitants.

For eleven hundred years the people of these valleys have managed their own affairs, have led an independent life, and in the case of questions have quoted their own customs and their own laws. Now that a railway has arrived, who can tell what is going to happen, and they themselves feel that change is at hand. It is only wonderful that these little states should have managed to preserve their independence in any form for so long.

Rural Advancement

Rural Civilization as Effective and Satisfying to Young Life as Urban

Progress of rural life, like other progress, must come from within rather than from without. The "Back to the farm" slogan, so often heard, is more or less a cry from another direction. It is designed as a relief to the overloaded industries of the cities. It throws out a request for the country to provide sustenance for people in temporary distress. That is not the way to build up a strong rural life.

"The real country life movement," says G. W. Fiske, in a study of country life opportunity, "is a campaign for rural progress conducted mainly by rural people, not a paternalistic plan on the part of city folk for rural redemption."

The contention is that rural civilization should become just as effective and satisfying to young life as urban. The urban civilization is the "aim" in this matter. The social trend has been in that direction. The country gravitates into the adjacent villages and towns; the villages into the cities. Men like to follow the crowd. That, it will be easily discerned, is poor business, unless there is some higher motive than the simple desire to go where the crowd is.

In the more mature and experienced social thought pf today the true method of rural development is found to be discerned. The country residents must help themselves. They must work out their own salvation to a large extent. Those who go among them as teachers and leaders of various professions must become ruralminded in their labor, but not look upon country life as a makeshift or a "stepping stone" to something else, but as life's calling, worthy of the best service.—Winnipeg Free Press.

Damaged Wheat Brings Good Price

Hundreds of farmers in Saskatchewan look into good fortune for thousands of dollars will be salvaged from the apparently ruined crops of last year. The damaged wheat, not considered worth threshing last fall because of low prices, is now being threshed and the results surprisingly good, the grain grading Nos. 3 and 4 Northern. Spring threshing has been carried on to a considerable extent in other years but the volume this year will probably exceed any year in the history of the province.

The Lock-Out

The Wife (regarding him from the bedroom window).—Where you bin this hour of the night?

The Husband.—I've been at me union, considerin' this 'ere strike.

The Wife.—Well, you can stay down there and consider this 'ere lock-out.

HAVE YOU A FAMILY?

This is of Importance to You

Niagara Falls, Ont.—"Three years ago my son, Gerald, had a severe attack of yellow jaundice. I tried three doctors but they only gave relief for short periods. As I had tried Dr. Pierce's Anuric Tablets on my other son, I decided to give him Dr. Pierce's Golden Medical Discovery and after using four or five bottles he was entirely well. I shall always keep a good work for all of Dr. Pierce's remedies. Today our medicine cabinet contains a bottle of each of these famous remedies."—Mrs. Catherine Dempsey, 33 Bridge St.

Dr. Pierce's Golden Medical Discovery is free from alcohol and injurious drugs. You can be certain you will find it a true blood-maker, tissue-builder, and restorative nerve tonic and that it will produce no evil after-effects.

DO YOU NEED HELP?

Windsor, Ont.—"Dr. Pierce's Golden Medical Discovery and his 'Pleasant Pellets' are wonderful medicines for home use. I used to suffer with weak lungs, smothering spells and sick headaches, but since taking the above-mentioned medicines these conditions have left me."

"One of my daughters took the 'Favorite Prescription' as a tonic during expectancy and she praises that medicine very highly, too."—Mrs. Elsie Harding, 11 Erie St. W.

Your neighborhood druggist sells all Dr. Pierce's Family Medicines, tablets or liquid. Write Dr. Pierce, Pres. Invalids' Hotel, Buffalo, N. Y., for free confidential advice. Branch Laboratory in Bridgeburg, Ont.

WEDDINGS

YARNALL—SMITH

In St. Barnabas church, the 6th day of July, 1922, Mr. John Thomas Yarnall and (Mrs.) Emily Mary Smith, both of Irvine, Alberta, were united in the bonds of Holy Matrimony. The Rev. E. A. Davis, rector of St. Barnabas, officiated.

GOEHRING—AMES

At the Washington Ave. Parsonage on Thursday, July 6th, Francis Bernard Goehring and Ruth Marjorie Ames were united in marriage, by Rev. A. D. Richard. Mr. and Mrs. Goehring will make their home in Alderson.

HOLLSTEIN—ABE

On Monday, July 10th, a wedding was solemnized in the Evangelical church, when Mr. Ernest Hollstein, of Irvine, was united in the bonds of holy matrimony to Miss Wilhelmine Abe, the latter having just arrived from the old country. The ceremony was performed by Rev. Gischler, of said church.

Federal Government Paid Out $1.300,000 Relief Last Winter

The liabilities of the federal government in regard to unemployment relief during the last winter are estimated at approximately $1,300,000. About half of this amount, as closely as can be approxinated at present, is on account of direct relief and the remainder is the federal share of the excess of public relief works undertaken by the local authorities during the winter. These figures are contained in a statement which has been given out by the minister of labor, Jame Murdock. The department of labor has not received, the statement says, all accounts which may be expected from the varjous municipalities, but the figures now given out are an approximate estimate of the total amount due.

WARNING

WATCH FOR THE RED FLAGS AT THE RIFLE RANGE, AND DON'T PASS OVER WHILE HESE FLAGS ARE FLYING. THAT IS THE SIGN THAT THE RANGE IS IN USE.
